Statement of the Problem	ii
Chapter 1	
GENERAL INTRODUCTION : Part - I	
<u>Some Aspects of the Chemistry of Hot Corrosion</u>	
1.1 Introduction	1
1.2 Practical Examples of Hot Corrosion	2
1.3 Sources of Corrosive Deposit	3
1.4 Effect of Alloy Composition	4
1.5 Hot Corrosion Tests	5
1.6 Electrochemical Studies	9
1.7 Kinetics Studies	12
1.8 Temperature Dependence of Hot Corrosion in Tests	13
1.9 Effect of Alloy Composition	15
1.10 Effect of Salt Composition	21
1.11 Mechanism of Hot Corrosion	25
1.11.1 Initiation stage of hot corrosion attack	26
1.11.2 Propagation stage	26
1.11.3 Salt fluxing reactions	26
1.12 Rapp and Boto Acid-Base Fluxing Mechanism of a Pure Metal	29
1.12.1 Electrochemical reduction reaction	30
1.13 Basic Fluxing	34
1.14 Acidic Fluxing	37
1.14.1 Alloy induced acidic fluxing	37
1.14.2 Gas phase induced acidic fluxing	40
1.14.3 Salt component induced hot corrosion	42
1.15 Sulfur - Induced Hot Corrosion	42
1.16 Interaction Between the Various Hot Corrosion Propagation Modes	45

Chapter 2	GENERAL INTRODUCTION : Part - II			
	<u>Fossil Fuel Corrosion with Special Reference to Coal Ash Deposit Corrosion</u>			
2.1	Introduction	51
2.2	Oil Ash Corrosion	51
2.3	Coal Ash Deposit Corrosion	53
2.4	Indian Coal	55
2.5	Corrosive Action of Coal	58
Chapter 3	ANALYSIS OF COAL			
3.1	Inorganic Constituents in Coal	68
3.2	Determination of Mineral Matter in Coal at High Temperature Ashing	69
3.3	Low Temperature Ashing	70
3.4	Determination of Major and Trace Elements	71
	<u>Experimental</u>			
3.5	Analysis of Coal	72
3.6	Proximate Analysis	72
3.6.1	Milling of Coal	72
3.6.2	Moisture determination	72
3.6.3	Volatile matter determination	73
3.6.4	Ash determination	73
3.7	Analysis of Ash	73
3.7.1	Determination of soluble constituents	73
3.7.2	Determination of silica in an 'insoluble' silicate	74
3.7.3	Determination of sulfur	74
3.7.4	Determination of chloride	75
3.7.5	Determination of magnesium	75
3.7.6	Determination of sodium, potassium and calcium by flame photometer	75
3.7.7	Spectrophotometric determination of iron, chromium and vanadium	76
3.7.8	Determination of trace elements	79
3.8	Infrared Spectra	79

3.9	Thermogravimetric and Differential Thermal Analysis	79
3.10	X-Ray Diffraction Analysis	81
	<u>Results</u>			
3.11	Infrared Spectra	81
3.12	Thermogravimetric Studies	81
3.13	Differential Thermal Analysis	83
3.14	X-Ray Diffraction Analysis	83

Discussion

Chapter 4 ASH DEPOSIT CORROSION OF STAINLESS STEELS

Experimental

4.1	Coal Samples	91
4.2	Alloys	91
4.3	Preparation of the Ash Coated Specimens			91
4.4	Metallographic Preparation	92
4.5	Scanning Electron Microscopy	93
4.6	X-Ray Diffraction Analysis	93

Results

4.7	Oxidation Studies	95
4.7.1	Influence of sulfur	95
4.7.2	Influence of vanadium	97
4.7.3	Influence of alkali metals	97
4.7.4	Oxidation kinetics	97
4.8	Morphological Studies	99

Discussion

Chapter 5 ASH DEPOSIT CORROSION OF SUPERALLOYS

Experimental

5.1	Coal Samples	114
-----	--------------	-----	-----	-----

5.2	Alloys	114
5.3	Specimen Preparation	114
5.4	Ash Coating	115
5.5	High Temperature Oxidation Studies	115
5.6	Metallographic Preparation	115
5.7	Scanning Electron Microscopy	116
5.8	X-Ray Diffraction Analysis	116
5.9	Electron Microprobe Analysis	116
	<u>Results</u>				
5.10	Oxidation Studies	117
5.11	Morphology of the Scales	118
	<u>Discussion</u>				
Chapter 6	HOT CORROSION OF SUPERALLOYS IN PRESENCE OF SODIUM SULFATE AND TRANSITIONAL METAL SULFATES				
	<u>Experimental</u>				
6.1	Alloys	132
6.2	Preparation of Salts	132
6.3	Preparation of the Specimens	132
6.4	Hot Corrosion Studies	132
6.5	Metallographic Preparation	133
6.6	X-Ray Diffraction Analysis	133
6.7	Scanning Electron Microscopy	134
	<u>Results</u>				
6.8	Oxidation Studies	134
6.8.1	Effect of sodium sulfate	135
6.8.2	Effect of transition metal sulfates	139
6.9	Morphological Studies	140
	<u>Discussion</u>				

Chapter 7	SUMMARY, CONCLUSIONS AND SUGGESTIONS FOR FURTHER WORK					
7.1	Summary	156
7.2	Conclusion	165
7.3	Suggestions for Further Work				...	168
References	170
List of Publications	188
