Acknowledgements

I am profoundly grateful and exceedingly obliged to my supervisor Professor M. Saleemuddin, who provided excellent guidance and indefatigable interest at each and every stage of this thesis. He gave me vision and new directions without which it would have been impossible for me to complete this research work. The thought-stimulating discussions that I had with him perfected many concepts and enabled me in articulating the novel aspects of this work.

I would like to express my deep sense of gratitude to Professor Masood Ahmad, Chairman of the Department of Biochemistry who provided me all the facilities in pursuance of my research.

The valuable comments and suggestions provided by all the faculty members instilled enthusiasm and ensured smooth continuation of my thesis.

I am highly indebted to Dr Owais and Dr Rizwan of the Department of Biotechnology for their active help and guidance in the experiments.

I would also like to express my genuine thanks to my seniors Dr. Atia, Dr Ulfaat, Dr Hemlata and Dr Athar who extended their cooperation and guidance. A token of appreciation to my lab mates Rana, Sonali, Sonish, Naghma, Arshi, Suhail, Amjad, Kashif, Arivarasu, Asfar, Showket, Azhar, Sandeep, Kakashan, Fouzia, Iram, Irfana, Yasha and Shamila for their nice company. I am especially grateful to Rawan for being a wonderful lab colleague.

My heartfelt thanks to my friends Samina, Shahid, Kaleem and Sheema for their affable company and amicable help. The co-operation and help I got
from my friend Sadaf is far beyond one would expect from a colleague and an intellectual companion.

I would like to gratefully acknowledge the help of the library staff of Biochemistry department for providing me numerous reference materials. Help rendered by Mr. Mujtaba Ahmed for his excellent photographic techniques, Mr. Saleemuddin for transforming my scribbles into elegant figures, and Mr. Zaheer Ahmad for expert word processing of the manuscript deserve words of appreciation.

Finally I would like to thank my parents for their unstinting support, encouragement and patience through the so many long hours spent in carrying out my research work, and for teaching me the value of hard work. I can never forget the love and affectionate treatment I got from my grand father Padam Shree Prof. M. Shafi, my husband, and from the youngsters, Aqeel, Suhail, Adeeba, Amir, Zainab and Humaira who gave me moments of joy despite the arduous schedule.

Hina Jamil
