## INTRODUCTION

(A) General

- Inter- and intra-renal heterogeneity of proximal tubules (PT) 3
- Acute Renal Failure (ARF) 6
- Pathophysiology of ARF 8

(B) Aminoglycoside nephrotoxicity 9

- Molecular and pharmacologic aspects of Aminoglycoside Nephrotoxicity 9
- Renal transport of aminoglycosides 11
- Morphologic patterns of Aminoglycoside Nephrotoxicity 14
- Cellular Mechanisms of Aminoglycoside Toxicity 16

(C) Pathophysiology of Uranyl Nitrate-Induced ARF 19

(D) Protection and prevention of ARF 22

- Protection and/or prevention against GM and UN nephrotoxicity 24

## SCOPE OF THE THESIS

## MATERIALS AND METHODS 35-58

### Materials 35

### Methods and Experimental Procedure 39-58

1. Animal Protocol 39
2. Analysis of Serum Parameters 41
3. Preparation of Kidney Homogenates 43
4. Brush Border Membrane preparation 43
5. Enzyme Assay 48
   (a) Assay of carbohydrate metabolism enzymes 48
   (b) Assay of Basolateral membrane (BLM) and lysosomal marker enzymes 51
   (c) Assay of marker enzymes of brush border membrane 52
6. Protein Estimation 54
7. Transport 54
8. Preparation of Low Phosphorus Diet (LPD) 55
9. Preparation of Thyroxine (T3) Injection 55
10. Animal protocol for LPD and T3 Treatment 55

RESULTS AND DISCUSSION 59-214
Results I 59
Discussion I 110
Results II 114
Discussion II 162
Results III 171
Discussion III 208

SUMMARY 215
