ACKNOWLEDGEMENTS

Though only my name appears on the cover of this thesis, a great many people have contributed to its production. I take this opportunity to owe my gratitude to all those people who have made this thesis possible and because of whom my experience has been one that I will cherish forever. You all are angels sent to me by the Almighty itself.

It cannot be argued with that the most influential person in my research and academic career has been my supervisor, Prof. Smita Chaudhry. She patiently provided the vision, encouragement and advice necessary for me to progress through the doctoral program and complete my thesis. Without her guidance and constant feedback this Ph.D. would not have been achievable. I am very grateful for her patience, motivation, enthusiasm, and immense acquaintance that, taken together, make her a great mentor.

I extend my sincere word of thanks to Director, Institute of Environmental Studies for permitting me to use Institute’s laboratory and library facilities for the research work.

I owe my sincere gratitude to Prof. Sharda Gupta, Professor Emeritus, Department of Botany, for her passionate advice, moral support and encouragement throughout the research work.

I also express my sincere thanks to all the faculty members and non-teaching staff of the Institute of Environmental Studies for their ever possible cooperation and support whenever needed. I take this opportunity to specially thank Mr. Ramnath for his immense help without which the sample collection part of my thesis would have been a chimera. I also thank Mr. Matbar, Mr. Pyara Singh and other technical staff of the laboratory for their help during the analysis work. My thanks are also due to Mr. Suresh for his help in all the administrative work related to my doctoral programme.

I also acknowledge the financial help received in the form of University Research Scholarship (URS) from Kurukshetra University, Kurukshetra without which this dream could not have been materialized.

Words are not enough to put on record a deep sense of gratitude for my friends especially Mrs. Manju Sharma, Mrs. Jyoti Panwar and Dr. Jyoti Luhach for their timely help, support, love, affection, care and appreciation. Their moral support and kind heartedness motivated me to overcome the difficult times. My thanks are also due
to other friends who directly or indirectly helped me in completing this research tenure successfully.

The best outcome from these past five years is finding my best friend Mr. Ankit Sharma. He has been a true critic and a great supporter during my good and bad times. He has been non-judgmental of me and instrumental in instilling confidence. I am indebted to him for his faith in me and my intellect and for always being there for me whenever needed.

Finally, I would like to acknowledge the people who mean world to me, my father Sh. Amar Dass Arora, my mother Smt. Basant Rani and all family members. I extend my respect to my parents and all elders to me in the family. I don’t imagine a life without their love and blessings. I heartily thank them for showing faith in me and giving me liberty to choose what I desired. My love is for the little charms Ansh and Avani, my nephew and niece for their charming presence around me. Last but not the least my special thanks are also due to my niece, Aashi, for cherishing me with her presence all the time, bearing my laziness and extending her helping hand to the extent as possible as she can. I consider myself the luckiest in the world to have such a supportive family, standing behind me with their love and support.

(Pooja Arora)
