

Chapter	CONTENTS	Page No.
1.0.	General Introduction 1.1. Description of the liver 1.2. Functions of liver 1.3. Liver damage – An overview 1.3.1. Types of liver damage 1.4. Therapy of liver damage 1.4.1. Chemotherapy for non-alcoholic liver damage 1.4.2. Chemotherapy of alcoholic liver damage 1.4.3. Organ transplantation therapy 1.4.4. Alternative chemotherapy	1-25
2.0.	Aim and Objectives	26
3.0.	Review of literature	27-48
4.0.	Collection, Identification, Extraction and Phytochemical analysis of mangrove plants 4.1. Introduction 4.2. Materials and Methods 4.2.1. Description of study area 4.2.2. Collection and identification of samples 4.2.3. Preparation of extracts 4.2.4. Phytochemical analysis 4.3. Results	49-68
5.0.	Hepatoprotective effect of chosen mangrove plants against CCl₄ induced acute liver damage in rats 5.1. Introduction 5.2. Materials and Methods 5.2.1. Animals 5.2.2. Carbon tetrachloride (CCl ₄) induced hepatotoxicity 5.2.3. Assessment of liver function tests 5.2.4. Histopathological analysis 5.2.5. Statistical analysis 5.3. Results	69-99

<p>6.0.</p>	<p><i>In vitro</i> antioxidant property of <i>Bruguiera cylindrica</i> leaf extract</p> <p>6.1. Introduction</p> <p>6.2. Materials and Methods</p> <p> 6.2.1. Determination of total phenolic Compounds</p> <p> 6.2.2. Determination of DPPH radical scavenging activity (DPPH%)</p> <p> 6.2.3. Determination of hydroxyl radical scavenging activity (HRSA)</p> <p> 6.2.4. Determination of nitric oxide radical scavenging activity</p> <p> 6.2.5. Determination of lipid peroxidation inhibition assay (LPO)</p> <p> 6.2.6. Determination of total antioxidant activity</p> <p> 6.2.7. Determination of total reducing power</p> <p> 6.2.8. Determination of ferric antioxidant power assay (FRAP)</p> <p> 6.2.9. Determination of superoxide radical scavenging assay (SOD)</p> <p>6.3. Results</p>	<p>100-116</p>
<p>7.0.</p>	<p>Standardization and quality evaluation of the most effective hepatoprotective leaf extract of <i>Bruguiera cylindrica</i></p> <p>7.1. Introduction</p> <p>7.2. Materials and Methods</p> <p> 7.2.1. Analysis of physical properties</p> <p> 7.2.1.1. Ash values</p> <p> 7.2.1.2. Total ash</p> <p> 7.2.1.3. Water soluble ash</p> <p> 7.2.1.4. Acid insoluble ash</p> <p> 7.2.1.5. Ethanol soluble ash</p> <p> 7.2.2. Analysis of organoleptic properties</p> <p> 7.2.3. Microbiological studies</p> <p> 7.2.4. Heavy metal analysis</p> <p> 7.2.5. High performance thin-layer chromatography (HPTLC) fingerprinting</p> <p>7.3. Results</p>	<p>117-129</p>

8.0.	General Discussion	130-137
9.0.	Summary and Conclusion	138-141
10.0.	References	142-180
