Chapter 1	INTRODUCTION	1
1.1	Historical Background-Inventory Theory	2
1.2	A Brief account of the Inventory Theory	7
1.3	Queueing Theory	11
1.4	Relation between Queues and Inventories	20
1.5	Renewal Process	21
1.6	Semi-Markov and Markov Renewal Process	23
1.7	A Brief account of the results in this thesis	26
Chapter 2	AN INVENTORY MODEL WITH MARKOV DEPENDENT DEMAND QUANTITIES	31
2.1	Introduction	31
2.2	Description of the Model	32
2.3	Analysis of the Model	34
2.4	Limiting Distribution	40
2.5	Optimization Problem	44
2.6	Numerical Illustration	46
Chapter 3	SOME INVENTORY MODELS WITH MARKOV DEPENDENCE	48
3.1	Introduction	48
3.2	Model I: Replenishment quantities forming Markov chain	51
3.3	Model II: Reordering levels forming Markov chain	67
Chapter 4	BULK DEMAND INVENTORY SYSTEM WITH RANDOM LEAD TIME AND SERVER VACATION	77
4.1	Introduction	77
4.2	Description	78
4.3	Analysis	81
4.4	System Size Probabilities	85
4.5	System Reliability	88

Cont'd.

Chapter 5	FINITE CAPACITY QUEUEING SYSTEMS WITH STATE DEPENDENT NUMBER OF STAGES OF SERVICE	.. 90
5.1	Introduction	.. 90
5.2	Model I	.. 93
5.3	Model II	.. 100
5.4	Numerical Illustrations	.. 104
Chapter 6	A BULK SERVICE QUEUE WITH SERVICE TIME DEPENDENT BATCH SIZE	
6.1	Introduction	.. 109
6.2	Description of the Models	.. 110
6.3	Analysis of the Models	.. 113
6.4	System Size Probabilities	.. 119
6.5	Steady State Analysis	.. 122
6.6	Distribution of the Busy Cycle and Busy Period	.. 125
6.7	Virtual Waiting Time Distribution	.. 130
6.8	Control Problem	.. 132
Chapter 7	FINITE CAPACITY $G/E_k/1$ AND $M/G^{a,b}/1$ QUEUEING SYSTEMS	.. 136
7.1	Introduction	.. 136
7.2	Description of the Models	.. 137
7.3	Model I: $G/E_k/1$ Queue	.. 140
7.4	Model II: $M/G^{a,b}/1$ Queue	.. 145
Chapter 8	TRANSIENT SOLUTION TO $M^X/G^Y/1/b$ QUEUE WITH VACATION	.. 153
8.1	Introduction	.. 153
8.2	Description of the Model	.. 154
8.3	Transition Time Densities	.. 156
8.4	System Size Probabilities	.. 159
8.5	Busy Period Distribution	.. 160
8.6	Virtual Waiting Time Distribution	.. 163
	REFERENCES	.. 170
