CONTENTS

Chapter I : Introduction 1

Chapter II : On the determination of the classes of saturation in the theory of approximation of functions. 20

Chapter III : On the degree of approximation to a function by triangular matrix of its Fourier series and its conjugate series. 31

Chapter IV : On the degree of approximation to a function belonging to weighted \((L^p, \phi(t))\) class. 46

Chapter V : On the degree of approximation of functions belonging to the class \(Lip(\phi(t), p)\) using \(A_\lambda\) operators. 60

Chapter VI : On the degree of approximation of functions belonging to the class \(Lip(\phi(t), p)\) using \((J, p_n)\) and Borel Operators. 70

Chapter VII : On the degree of approximation of certain functions by triangular means. 83

Appendices :

A : Bibliography 92

B : True copies of letters of acceptance.
