CONTENTS

Acknowledgement .......................................................... i - ii
List of Tables ............................................................... x - xv
List of Figures .............................................................. xvi - xxiii
List of Plates ............................................................... xxiv - xxv
Glossary ........................................................................ xxvi - xxvii
Abbreviation ................................................................. xxviii - xxx

INTRODUCTION .............................................................. 1 - 35

Significance of the Work .................................................. 1 - 35
Objective........................................................................ 1 - 35
Hypothesis ...................................................................... 1 - 35
Data Base & Methodology .............................................. 1 - 35
Organization of the Work ............................................... 1 - 35
Work Review done so far .............................................. 1 - 35
Conceptual Frame Work of the Study ............................ 1 - 35

CHAPTER - I GEOGRAPHICAL PROFILE OF
THE STUDY AREA ............................................................. 36 - 63

1.1 General Setting of the Study Area .............................. 36 - 63

1.1.1 Location and Administrative divisions .................... 36 - 63

1.2. Physical Setting of the Study Area ............................ 36 - 63

1.2.1 Geological Structure .............................................. 36 - 63
1.2.2 Hydrological Profile .............................................. 36 - 63
1.2.3 Drainage ................................................................ 36 - 63
1.2.4 Climate ............................................................... 36 - 63
1.2.5 Soils ...................................................................... 36 - 63
1.2.6 Vegetation ......................................................... 36 - 63
1.3 Demographic Characteristics of the Study Area
   1.3.1 Population Growth
   1.3.2 Population Density
   1.3.3 Gender Ratio
   1.3.4 Literacy
   1.3.5 Spatial Analysis of Population (Ward Wise)
     1.3.5.1 Population Distribution (Ward Wise)
     1.3.5.2 Population Density (Ward Wise)
     1.3.5.3 Literacy Ratio (Ward Wise)

1.4 Cultural Setting of the Study Area
   1.4.1 Urban Sprawl and Land Use/Land Cover Change
     1.4.1.1 Urban Sprawl
     1.4.1.2 Land Use/Land Cover Change
   1.4.2 Development of Industries
   1.4.3 Basic Amenities and Facilities
     1.4.3.1 Sewerage System
     1.4.3.2 Source of Drinking Water
     1.4.3.3 Transportation
     1.4.3.4 Market Places / Shopping Centers

CHAPTER-II AIR POLLUTION 64-96

2.1 Sources of Air Pollution
   2.1.1 Vehicular Growth Pattern
   2.1.2 Frequency of Vehicles on Major Roads
   2.1.3 Industry & other Sources of Air Pollution

2.2 Air Pollution Estimation

2.3 Spatio-Temporal Analysis of Ambient Air Quality of Lucknow City during Pre and Post-Monsoon (1998-2004)
   2.3.1 Temporal Analysis of Air Quality Status During Pre-Monsoon
2.3.1.1 Trend of RSPM Concentration during Pre-monsoon
2.3.1.2 Trend of SO₂ Concentration during Pre-monsoon
2.3.1.3 Trend of NO₂ Concentration during Pre-monsoon

2.3.2 Temporal Analysis of Air Quality Status during Post-Monsoon (1998-2004)
   2.3.2.1 Trend of SPM Concentration during Post-Monsoon
   2.3.2.2 Trend of SO₂ Concentration during Post-Monsoon
   2.3.2.3 Trend of NO₂ Concentration during Post-Monsoon

2.3.3 Spatial analysis of Ambient Air quality in Lucknow City during Pre-Monsoon and Post-Monsoon (1998-2004)
   2.3.3.1 Spatial Analysis of Air quality status During Pre-Monsoon
   2.3.3.2 Spatial Analysis of Air quality status During Post-Monsoon

2.4 Intensity of Air Pollution

2.5 Ambient Air Quality Status of Major Road Crossing (2004)

CHAPTER-III WATER POLLUTION

3.1 Sources of Water Pollution
3.2 Analysis of Gomti River Water
3.3 Quality of Underground Water
3.4 Under Ground Water Resource Potential
3.5 Depth of Water Table
3.6 Management of Water Supply
3.7 Drinking Water Quality
   3.7.1 Treated Water Quality at Aishbagh Water Works
   3.7.2 Supplied Water Quality Status at different Location

CHAPTER-IV NOISE POLLUTION

4.1 Sources of Noise Pollution
4.2 Spatio-Temporal Analysis of Noise Pollution during Day and Night
4.2.2 Trend of Night Time Noise Level (1998-2004)
4.2.3 Noise Level Record on the Occasion of Deepawali

CHAPTER -V  SOLID WASTE GENERATION, DISPOSAL AND MANAGEMENT 147-162

5.1 Generation of Solid Waste
5.2 Temporal Variation of Solid Waste Generation (1991-2004)
5.3 Physical and Chemical Composition of Solid Waste
   5.3.1 Physical Characteristics of Solid Waste
   5.3.2 Chemical Characteristics of Solid Waste
5.4 Solid Waste Management in Lucknow City
5.5 Treatment Practices for Solid Waste Disposal in Lucknow City

CHAPTER-VI SOCIAL POLLUTION 162-184

6.1 Social Pollution in Lucknow City
   6.1.1 Slums
   6.1.2 Crime
   6.1.3 Juvenile delinquency
   6.1.4 Suicide
   6.1.5 Prostitution
   6.1.6 Communal Riots
   6.1.7 Crime against Women

CHAPTER -VII INDOOR POLLUTION AND ITS IMPACT ON HEALTH 185-329

7.1 Indoor Air Pollution
   7.1.1 Variable of Indoor Air pollution: A Spatial analysis
      7.1.1.1 Per head Living Space Availability (Room Density)
      7.1.1.2 Ventilation
      7.1.1.3 Multi Used Room Houses
      7.1.1.4 Smoking in House
7.1.1.5 Use of Bio Fuel for Cooking
7.1.1.6 Smoke coming from Outside
7.1.1.7 Use of Kerosene as cooking Fuel
7.1.1.8 Smoke Remain Inside the House

7.1.2 Spatial Analysis of indoor Air Pollution Related Diseases
7.1.2.1 Conjunctivitis
7.1.2.2 Rhinitis
7.1.2.3 Allergies
7.1.2.4 Sore Throat
7.1.2.5 Asthma
7.1.2.6 Bronchitis
7.1.2.7 Tuberculosis
7.1.2.8 Pneumonia

7.1.3 Impact of Indoor Air Pollution on Health- A Quantitative Analysis

7.1.4 Intensity of Indoor Air Pollution

7.1.5 Intensity of Diseases Associated with Indoor Air Pollution

7.2 Household Water pollution (Water Supply and Sanitation Condition and Health)

7.2.1 Spatial Analysis of Water Supply and Sanitation Condition
7.2.1.1 Irregular Water Supply
7.2.1.2 Unsatisfactory Water Supply
7.2.1.3 Public Source of Drinking Water
7.2.1.4 Storage of Water in Open Container
7.2.1.5 Bathroom and Toilet Facilities not Available
7.2.1.6 Open Toilet Facility
7.2.1.7 Use of Manual Latrine
7.2.1.8 Open drainage around the Houses
7.2.1.9 Absence of Drainage around the House
7.2.1.10 Waste Water around the House
7.2.1.11 Water Logging
7.2.1.12 Improper Disposal of Feecal Matters from Manual Latrine

7.2.2 Spatial Analysis of Water Related and Water Born Diseases

7.2.2.1 Malaria
7.2.2.2 Fileriasis
7.2.2.3 Dengue fever
7.2.2.4 Typhoid Fever
7.2.2.5 Cholera
7.2.2.6 Diarrhoea
7.2.2.7 Dysentery
7.2.2.8 Amoebiasis
7.2.2.9 Hepatitis ‘A’
7.2.2.10 Jaundice
7.2.2.11 Gastroenteritis
7.2.2.12 Roundworm infestation

7.2.3 Impact of Household Water Pollution (Water Supply and Sanitation Condition) on Health: A Quantitative Analysis

7.2.4 Intensity of Household Water Pollution (Water Supply and Sanitation Condition)

7.2.5 Intensity of Water Related and Water Born Diseases

7.3 Indoor Noise Pollution

7.3.1 Spatial Analysis of Indoor Noise Pollution

7.3.1.1 Spatial Analysis of Noise in the Mohallah
7.3.1.2 Intensity of Noise in the House
7.3.1.3 Daytime Noise Pollution
7.3.1.4 Night Time Noise Intensity

7.3.2 Spatial Analysis of Indoor Noise Pollution Related diseases

7.3.2.1 Auditory Fatigue
7.3.2.2 Deafness
7.3.2.3 Interference with Speech
7.3.2.4 Annoyance
7.3.2.5 Disturbance in work Efficiency
7.3.2.6 Physiological changes

7.3.3 Impact of Indoor Noise Pollution on Health-
A Quantitative Analysis

7.3.4 Intensity of Indoor Noise Pollution

7.3.5 Intensity of Diseases Associated With Indoor Noise Pollution

7.4 Household Solid Waste Generation and Disposal

7.4.1 Spatial Analysis of Solid Waste Generation and Disposal
7.4.1.1 Storage of Household Waste in Open Space
7.4.1.2 Storage of Household Waste inside the House in Open Container
7.4.1.3 Mode of Household Waste Disposes Off
7.4.1.4 Solid Waste everywhere in the Mohallah
7.4.1.5 Quantity of Solid Waste in the Mohallah Huge or Small
7.4.1.6 Collection of Garbage by Municipality
7.4.1.7 Frequency of Solid Waste Collection by Nagar Nigam
7.4.1.8 Intensity of Solid Waste Generation

7.5 Intensity of Indoor Pollution and Diseases

7.5.1 Intensity of Indoor Pollution

7.5.2 Intensity of Incidence of Diseases Associated with Indoor Pollution

Conclusions and Recommendations 330-338
Bibliography 339-356
Appendix 357-363
