CONTENTS

CHAPTER - I  General Introduction  1-78

1.1  Introduction
1.2  Chromatography
1.3  Thin-Layer Chromatography
1.4  TLC Procedure
1.5  Principles and techniques
1.6  Chromatographic Systems
1.7  Visualization
1.8  Qualitative Analysis
1.9  Quantitative Analysis
1.10  Advantages of TLC
1.11  Comparison of TLC, HPLC and HPTLC
1.12  Combination of TLC with Other Analytical Techniques
1.13  Amphipathic Substances
1.14  Surfactant
1.15  Amino acid
1.16  Dyes
1.17  Review of Literature
    References

Thin Layer Chromatographic Analysis of Amino Acids

CHAPTER - II  79-104

Studies on Adsorption Behaviour of Amino Acids through Soil Static Phase
by Thin Layer Chromatography

2.1  Introduction
2.2  Experimental
2.3  Results and Discussion
CHAPTER - III

On-Plate Separation of Amino Acids with Green Eluent

3.1 Introduction
3.2 Experimental
3.3 Results and Discussion
3.4 Conclusion

CHAPTER - IV

Synergistic Effect of Cationic-Nonionic Surfactants on Simultaneous Separation of Phenylalanine and Tyrosine

4.1 Introduction
4.2 Experimental
4.3 Results and Discussion
4.4 Application
4.5 Conclusion

CHAPTER - V

Use of Carbohydrates as Eluent in Thin Layer Chromatographic Separation of Amino acids on Conventional Stationary Phases

5.1 Introduction
5.2 Materials and Methods
5.3 Results and Discussion
Thin Layer Chromatographic Analysis of Surfactants

CHAPTER - VI 159-173

Thin Layer Chromatographic Studies of Cationic and Nonionic Surfactants Using Aqueous Solutions as Mobile Phase: Selective Separation of DTAB from Other Surfactants

6.1 Introduction
6.2 Experimental
6.3 Results and Discussion
References
Tables and Figures

Thin Layer Chromatographic Analysis of Dyes

CHAPTER – VII 174-191

Resolution of Quaternary Mixture of Ionic Dyes on Biphasic Alumina-Keiselguhr Thin Layer Plate: Synergistic Effect of Cationic-Nonionic Surfactants

7.1 Introduction
7.2 Experimental
7.3 Results and Discussion
7.4 Conclusion
References
Tables and Figures
