ACKNOWLEDGEMENTS

It has been my proud privilege to work under the supervision of Prof. S. Ishar Husain, Chairman, Department of Mathematics, A.M.U., Aligarh, who introduced me to the study of Modern Differential Geometry and through whose inspiration the thesis took its present shape. I gratefully record my indebtedness to him for his enlightened training and constant encouragement throughout my research pursuit.

The Yogeshwari Education Society, Ambajogai and the University Grants Commission are both equally commendable for providing me the study leave and the financial assistance respectively.

I am also thankful to my coworkers and friends in the department, especially to Dr. A. G. Khan, Dr. A. Sharfuddin and Dr. Mahfoez Alam for their kind help and encouragements all along my stay at A.M.U., Aligarh.

( SHARIEF DESHMUKH )
