## CHAPTER-I

### INTRODUCTION AND REVIEW

1.1 Introduction 1  
1.2 Nanoparticles 2  
1.3 Properties of Nanoparticles 3  
1.4 Classification of Nanostructures 4  
1.5 Nanocomposites 5  
1.6 Crystal Structure of Indium oxide, Tin oxide and Indium Tin oxide 6  
1.7 Optical Properties of Indium oxide, Tin oxide and Indium Tin oxide 10  
1.8 Earlier works of nanopowder through combustion synthesis 12  
1.9 Applications 13  
1.10 Scope of the Thesis 14  
References 16

## CHAPTER – II

### PREPARATION TECHNIQUES OF NANOPowders

2.1 Introduction 17  
2.2 Methods of synthesis of nanomaterials 17  
2.3 Powder Preparation Techniques 19  
2.4 Preparation of In$_2$O$_3$, SnO$_2$, ITO powders by Combustion process 23  
2.5 Mode of Synthesis of combustion process 24  
2.6 Combustion Process to Prepare In$_2$O$_3$, SnO$_2$ and ITO 26  
2.7 Conclusion 31  
References 32
CHAPTER - III
PRINCIPLES AND EXPERIMENTAL PROCEDURES OF CHARACTERIZATION

3.1 Introduction 33
3.2 Thermo Gravimetric Analysis 34
3.3 Powder X ray Diffraction Technique 36
3.4 Rietveld Analysis 39
3.5 Surface Morphological Studies 44
3.6 Transmission Electron Microscopy (TEM) 46
3.7 Optical Characterization 48
3.8 Laser Raman Spectroscopy 51
3.9 Hall Effect Measurements 53
3.10 X-ray Photoelectron Spectroscopy (XPS) 55
3.11 Gas Sensor Studies 57
3.12 Conclusion 63
References 64

CHAPTER - IV
SYNTHESIZATION AND CHARACTERIZATION OF In$_2$O$_3$

4.1 Introduction 65
4.2 Preparation of In$_2$O$_3$ 67
4.3 DTA/TGA analysis of In$_2$O$_3$ 67
4.4 Structural Characterization of In$_2$O$_3$ 69
4.5 UV – Vis – NIR Spectrum Analysis of In$_2$O$_3$ 75
4.6 Electrical Measurements 76
4.7 Surface Morphology of In$_2$O$_3$ Powder 76
4.8 Compositional and Elemental analysis of In$_2$O$_3$ 79
4.9 Fourier Transform Infrared Spectroscopy of In$_2$O$_3$ 80
4.10 Laser Raman Spectra Indium Oxide 81
4.11 PL Studies of In$_2$O$_3$ 82
CHAPTER - V
SYNTHESIZATION AND CHARACTERIZATION OF SnO₂

5.1 Introduction 90
5.2 Preparation of SnO₂ powder 92
5.3 DTA/TGA analysis of SnO₂ 93
5.4 Structural Characterization of SnO₂ 94
5.5 UU-Vis-NIR Studies 99
5.6 Electrical Properties 100
5.7 Morphology of SnO₂ nanopowder 101
5.8 Stoichiometric and Compositional Analysis 103
5.9 Fourier Transform Infrared Spectroscopy of SnO₂ 104
5.10 Laser Raman spectra of SnO₂ 105
5.11 PL Studies of SnO₂ 106
5.12 Conclusion 107
References 108

CHAPTER-VI
SYNTHESIZATION AND CHARACTERIZATION OF ITO NANOPOWDERS WITH DIFFERENT PROPORTIONS

6.1 Introduction 110
6.2 Synthesis of nanocrystalline tin doped indium oxide powders 112
6.3 TGA and DTA Analysis 113
6.4 Structural properties of In₂O₃:Sn powders 116
6.5 UV-Vis-NIR spectra analysis 130
6.6 PL studies of ITO powders 133
6.7 Surface morphological studies of ITO powders 135
6.8 Compositional and elemental analysis of ITO powders 136
CHAPTER – VII

STUDIES ON SENSING PROPERTIES TO ETHANOL GAS

7.1 Introduction 148
7.2 Preparation and sensing properties of semiconductor oxide gas sensors 150
7.3 Studies on In$_2$O$_3$ gas sensors 153
7.4 SnO$_2$ gas sensor 155
7.5 In$_2$O$_3$:Sn based Gas Sensors 159
7.6 Conclusion 159
References 161

CHAPTER – VIII

SUMMARY, CONCLUSION AND SUGGESTIONS FOR FUTURE WORK

8.1 Summary and Conclusion 162
8.2 Suggestions for the Future Work 166
