LIST OF TABLES

Table 3.1  Break-Up of the sample
Table 3.2  The test-retest and split-half reliability coefficients- Old Age Adjustment Scale
Table 3.3  Validity - Old Age Adjustment scale
Table 3.4  Validity - Old Age Adjustment scale
Table 3.5  Odd-even reliability – Materialism- Spiritualism scale.
Table 4.1  Frequency distribution based on age group.
Table 4.2  Frequency distribution based on place of stay.
Table 4.3  Frequency distribution based on duration of stay in old age homes.
Table 4.4  Frequency distribution based on religion.
Table 4.5  Frequency distribution based on marital status.
Table 4.6  Frequency distribution based on type of family
Table 4.7  Frequency distribution based on type of old age homes
Table 4.8  Frequency distribution based on educational status
Table 4.9  Frequency distribution based on previous occupations
Table 4.10 Means and S.D’s obtained in adjustment by the aged persons staying in old age homes and those staying in own homes and the corresponding ‘t’ values.
Table 4.11 The percentile scores obtained by the two groups of aged persons in adjustment.
Table 4.12 Means and S.D’s obtained in alienation by the elderly persons staying in old age homes and those staying in own homes and the corresponding ‘t’ values.
Table 4.13 Means and S.D’s obtained in materialism-spiritualism by the elderly persons staying in old age homes and those staying in own homes and the corresponding ‘t’ values in materialism-spiritualism.
Table 4.14 Means and S.D’s perceived social support obtained by the elderly persons staying in old age homes and those staying in own homes and the corresponding ‘t’ values.
Table 4.15  Means and S.D’s obtained in adjustment by the male and female subjects and the corresponding ‘t’ values.

Table 4.16  Means and S.D’s obtained in alienation by the male and female subjects and the corresponding ‘t’ values.

Table 4.17  Means and S.D’s in materialism-spiritualism by the male and female subjects and the corresponding ‘t’ values.

Table 4.18  Means and S.D’s in adjustment obtained by the economically dependent and independent groups of the aged and the corresponding ‘t’ values.

Table 4.19  Means and S.D’s in alienation obtained by the economically dependent and independent groups of the aged and the corresponding ‘t’ values.

Table 4.20  Means and S.D’s in materialism-spiritualism obtained by the economically dependent and independent groups of the aged and the corresponding ‘t’ values.

Table 4.21  Results of the ANOVA for adjustment, with respect to religion.

Table 4.22  Results of the ANOVA for alienation, with respect to religion.

Table 4.23  Results of the ANOVA for materialism-spiritualism, with respect to religion.

Table 4.24  Results of the post hoc test – God

Table 4.25  Results of the post hoc test – Religion

Table 4.26  Results of the post hoc test – Mysticism

Table 4.27  Results of the post hoc test – Spirits

Table 4.28  Results of the post hoc test – Total materialism-spiritualism

Table 4.29  Results of the ANOVA for adjustment, with respect to marital status.

Table 4.30  Results of the post hoc test – Health adjustment.

Table 4.31  Results of the post hoc test – Home adjustment

Table 4.32  Results of the post hoc test – Social adjustment

Table 4.33  Results of the post hoc test – Marital adjustment

Table 4.34  Results of the post hoc test – Emotional adjustment

Table 4.35  Results of the post hoc test – Financial adjustment

Table 4.36  Results of the post hoc test – Overall adjustment
Table 4.37  Results of the ANOVA for adjustment, with respect to marital status.
Table 4.38  Results of the post hoc test – Powerlessness
Table 4.39  Results of the post hoc test – Meaninglessness
Table 4.40  Results of the post hoc test – Normlessness
Table 4.41  Results of the post hoc test – Isolation
Table 4.42  Results of the post hoc test – Total alienation
Table 4.43  Results of the ANOVA for materialism-spiritualism, with respect to marital status
Table 4.44  Results of the post hoc test – God.
Table 4.45  Results of the ANOVA for adjustment, with respect to educational status.
Table 4.46  Results of the post hoc test – Health adjustment.
Table 4.47  Results of the post hoc test – Home adjustment.
Table 4.48  Results of the post hoc test – Social adjustment.
Table 4.49  Results of the post hoc test – Marital adjustment.
Table 4.50  Results of the post hoc test – Emotional adjustment.
Table 4.51  Results of the post hoc test – Financial adjustment.
Table 4.52  Results of the post hoc test – Overall adjustment.
Table 4.53  Results of the ANOVA for alienation, with respect to educational status.
Table 4.54  Results of the ANOVA for materialism-spiritualism, with respect to educational status.
Table 4.55  Correlations between age and adjustment variables.
Table 4.56  Correlations between age and alienation variables.
Table 4.57  Correlations between age and materialism-spiritualism variables.
Table 4.58  Correlations between perceived support and adjustment.
Table 4.59  Correlations between adjustment and alienation variables.
Table 4.60  Correlations between adjustment and materialism-spiritualism variables.
Table 4.61  Correlations between alienation and materialism-spiritualism variables.
