2.4.1. Fabrication of tin nanorods/AAO modified aluminium electrode 74
2.4.2. Fabrication of CoOx nanoflowers modified aluminium electrode 75
2.4.3. Fabrication of Fe₃O₄-Gnp composites modified aluminium electrode 76
2.4.4. Fabrication of Cobalt hexacyanoferrate modified aluminium electrode 76
2.4.5. Fabrication of Copper oxide modified aluminium electrode 77

2.5. Electrochemical measurements 78
2.5.1. Electrochemical characterization of SnNR/AAO/Al 78
2.5.2. Electrochemical characterization of CoOx/Al 79
2.5.3. Electrochemical characterization of Fe₃O₄-Gnp/Al 79
2.5.4. Electrochemical characterization of CoHCF/Al 80
2.5.5. Electrochemical characterization of CuO/Al 81

2.6. Preparation of analytes 81
2.7. Preparation of ss-DNA samples 82

Reference 83

Chapter §\$Chapter §\$

Electrochemical reduction of ortho nitrobenzaldehyde using modified aluminium electrode and its determination 84
3.1. Characterization of the as-prepared SnNR/AAO/Al 86
3.2. Electrochemical characterization of the modified electrode 90
3.2.1 Cyclic voltammetry of the modified electrode 90
3.2.2 Electrochemical Impedance Spectroscopy of modified electrode 91
3.3 Electrochemical reduction of ONB at SnNR/AAO/Al 92
3.3.1 Effect of supporting electrolyte 94
3.3.2 Effect of pH 94
3.3.3 Effect of scan rate 96
3.4. Electrochemical detection of ONB 100
3.5. Interference study 102
3.6. Real water analysis 103
3.7. Stability study 103
3.8. Conclusions 104

Reference 105

Chapter §\$Chapter §\$

Electrochemical sensor for the determination of guanine and ss-DNA using CoOx modified aluminium electrode 107
4.1. Characterization of modified electrode 109
4.1.1 SEM and XRD pattern of CoOx/Al 109
Chapter 7
Simultaneous determination of adenine and guanine using Fe$_3$O$_4$-Gnp modified aluminium electrode and its determination

5.1. Characterization of Fe$_3$O$_4$-Gnp/Al electrode
   5.1.1. SEM images of Fe$_3$O$_4$-Gnp/Al electrode
   5.1.2. XRD pattern of Fe$_3$O$_4$-Gnp/Al

5.2. Electrocatalytic behaviour of modified electrode
   5.2.1. Electrochemical oxidation of guanine
   5.2.2. Electrochemical oxidation of adenine
   5.2.3. Simultaneous determination of adenine and guanine
   5.2.4. Effect of graphite concentration in Fe$_3$O$_4$-Gnp/Al
   5.2.5. Effect of pH
   5.2.6. Effect of accumulation time
   5.2.7. Effect of scan rate

5.3. Simultaneous determination of adenine and guanine

5.4. Repeatability, Reproducibility and stability of the modified electrode

5.5. Interference study

5.6. Analytical applications

5.7. Conclusions

Reference

Chapter 8

Electrochemical sensor for Guanine using CoHCF/Al

6.1. Electrode modification conditions
   6.1.1. Effect of thickness

6.2. Electrochemical behavior of the modified electrode

6.3. Electrocatalytic oxidation of guanine at the surface of CoHCF – modified electrode aluminium electrode
   6.3.1. Effect of preconcentration (accumulation) time
   6.3.2. Effect of scan rate
6.3.3. Effect of pH 178
6.4. Detection Limit 181
6.5. Analytical applications 183
6.6. Stability of the modified electrode 185
6.7. Reproducibility 185
6.8. Interference study 185
6.9. Conclusions 187
Reference 189

Chapter 7.6.7.6.7.6.7.
Electrochemical sensor based on CuO modified aluminium electrode: Simultaneous determination of ascorbic acid and dopamine
7.1. Surface Characterization of electrodes 194
  7.1.1. SEM analysis 194
  7.1.2. XRD patterns of as deposited CuO/Al 196
7.2. Electrochemical characterization of CuO/Al 197
7.3. Electrochemical behavior of modified electrode 198
  7.3.1. Electrochemical oxidation of AA at CuO modified aluminium electrode 198
  7.3.2. Electrochemical oxidation of DP at CuO modified aluminium electrode 199
7.4. Simultaneous detection of AA and DP 200
  7.4.1. Effect of pH 202
  7.4.2. Effect of accumulation time 206
  7.4.3. Effect of scan rate 207
7.5. Simultaneous/individual determination of AA and DP 211
7.6. Reproducibility and stability 217
7.7. Conclusions 218
Reference 219

Chapter 7.7.7.7.7.7.
