ACKNOWLEDGEMENTS

First of all, I am thankful to Almighty Allah for providing me this opportunity to explore one of the most important topics of Management and to complete the requirements of the Doctoral Programme by submitting the Thesis on time.

It was a blessing to have an Internal Advisor like Prof. Parvaiz Taiib, whose continuous inspirations were the main driving force that led me forward in the research. His friendly and hospitable gestures would motivate any research scholar to pursue more knowledge, and would cherish for the entire life. His passion for perfection persuaded me to complete this work in its present form. I am also thankful to Dr. Sami A. Khan, Assistant Professor, Sultan Qaboos University, Oman, who was my External Advisor. His guidance helped me in my study immensely.

I am thankful to Aligarh Muslim University for providing me the entire infrastructure required for the research study. I would like to pay rich homage to the founders of the great institution. In fact, those noble men including Sir. Syed Ahmed Khan, with a far reaching vision, unfaltering belief and consistent efforts, have laid the foundation not only for one of the biggest educational institutions, but for the progress of the community in particular and the society at large.

I am very much grateful to Prof. Javaid Akhter, Dean, Faculty of Management Studies and Research for his continuous guidance and support. I am also thankful to Dr. M. Khalid Azam, Chairman, Department of Business Administration for his support. I am thankful to Dr. Naved Khan, whose guidance in using statistical techniques was much helpful. I am grateful to all teaching and support staff members of Department of Business Administration for their help. My thanks also go to the staff members of the University Library and the Guest House. I am also grateful to All India Management Association for providing me this opportunity.

I am thankful to ADMA – OPCO’s Management for giving me the permission to conduct the research. I would like to record special thanks to Senior Vice
President, Administrative Support Asset Unit and Manager, Manpower Development Division for their kind support and guidance.

My thanks also go to all my colleagues including Mr. Fazalur Rahman, Research Scholars in AMU, and all those who have supported me in my endeavour. I am indebted to Mr. Mustafa Darimi and other brothers in Musaffah for their continuous encouragement and prayers.

My Doctoral Programme could not have completed without the support, guidance and prayers of my parents. My father Mr. Jamaluddin Sahib, mother Ms. Fatima Beevi, and mother-in-law Ms. Aysha Umma have provided incessant inspirations for me. I am highly indebted to my wife Dr. Aysha, son Farzeen, and daughter Mehrin for their love, support, patience and prayers.

Shaju Jamaluddin
