ACKNOWLEDGEMENT

The completion of my research work on "The social and psychological factors of drop-outs (13 - 18 years) in relation to drug abuse in Mizoram" has been a long and arduous but nevertheless inspiring and satisfying task. I express my heartfelt gratitude to Dr. R.S. Wangu, Reader, Department of Education, N.E.H.U. Mizoram Campus, for his painstaking, meticulous and expert guidance.

My profused thanks to my dear and close friend Ms. Vanlaldini, Centre Director, Siloam De-addiction and Rehabilitation Centre, Govt. of Mizoram, for her enthusiastic support. She personally accompanied me on many of my sojourns to the innumerable Homes, Centres and Camps set up for the care of drug abusers. Special words of thanks to Mr. Lalhmunsanga, Asst. Excise Commissioner, Department of Excise, Government of Mizoram. He made way-out efforts to facilitate my study right from its very inception. I also acknowledge the help extended to me during the entire phase of data collection by leaders of several branches of the Young Mizo Association (Y.M.A.) and members of the Village Councils and Village Defence Parties in the various districts of Mizoram.

I am deeply indebted to the young boys and girls who had unfortunately been caught in the vicious net of drug use and abuse. Without their friendship and willing co-operation, my research work would not have been possible. To the parents with whom I share the sorrow and pain brought to them by their drug abusing dropped out children, I express my heart-felt thanks for providing me with relevant information. My sincere gratitude goes to all those working in the De-addiction and Rehabilitation Centres in Mizoram. The welcome and hospitality shown by them during my frequent visits, their eager support and untiring efforts to help saw me through the difficult period of data collection.

My deep gratitude goes to my husband Vanlalhuaka for his endless sacrifice and understanding and for making every opportunity open for me to pursue and complete my studies inspite of the inconvenience caused at home.

Finally, I extend my sincere thanks to all those whose names I have not specifically mentioned but who have nevertheless made every possible efforts to help me and without whose helping hands my research work would not have been completed.

(VANLALHRUAII)
