The investigations presented in this thesis have been carried out under the excellent guidance and encouragement of Dr. T.R. Ananthakrishnan, Head of the Department of Physics, St. Paul's College, Kalamassery and Dr. M.K. Rudra Warier, Retired Deputy Director of Collegiate Education and Head of the Department of Physics, Maharaja’s College, Ernakulam. It is with great pleasure that I express my sincere gratitude for their able guidance and constant encouragement.

I am also grateful to Dr. V.P.N. Nampoori, Professor, International School of Photonics, Cochin University of Science and Technology, for his competent advices and help throughout the course of this work.

I gratefully acknowledge the financial assistance extended by

(1) State committee on Science Technology and Environment, Government of Kerala, for the project entitled, “Thermoluminescence Studies on Minerals and Doped Phosphors”, for purchasing/assembling the laboratory equipments in the Department of Physics, Maharaja’s College, Ernakulam as a part of the work.

(2) University Grants Commission, for the project entitled “Luminescence Studies on Rare Earth Doped Phosphors”, for purchasing/assembling the laboratory equipments in the Department of Physics, St. Paul’s College, Kalamassery, as a part of the work.
I wish to place on record my sincere thanks to Dr. K. S. V. Nambi, Head of the Environment Assessment Division (now retired), Bhabha Atomic Research Centre (BARC), Mumbai, for his interest and encouragement in my work and for granting me permission to make use of the laboratory facilities in his division. I am equally thankful to Dr. M. R. Menon and Sri. M. P. Chougaonkar of the same Division for their help in my work related to TL Dating and β excited TL studies.

I also wish to place on record my sincere thanks to Dr. V. B. Kartha, Head of Spectroscopy Division (now retired), BARC, Mumbai, for his interest, help and encouragement in my work and for granting me permission to make use of the laboratory facilities in his division. I am equally thankful to Dr. N. P. Karanjikar and Dr. A. Venugopalan of the same division for their help in my work related to X-ray excited fluorescence studies.

I am also thankful to Dr. H. Singh, Head of the Rare Earth Division, BARC, Mumbai, for his interest and help in my work and for granting me permission to make use of the laboratory facilities in his division. I am equally indebted to Dr. G. Alexander and Dr. P. Ramakrishnan of Rare Earth Division BARC Mumbai for their help in my work related to Quantum Fluorescence Efficiency studies.

I am highly indebted to Fr. Jose Chelangara, Manager, Prof. V. X. Sebastian, Principal, Prof. Antony Isaac (former Principal) and my colleagues in the Department of Physics, of St. Paul’s College, Kalamassery for their interest, support and encouragement in my work.

I would like to thank Prof. P. G. Gangadharan Nair, Head, Dr. K. Indira, former Head, and Mr. P. I. Poulose Faculty member in the Department of Physics of Maharaja’s College Eranakulam for availing the laboratory facilities in the
Department, co-operation and support. I am also thankful to Prof. T.V. Balasubrahmaniam, Head of the Department of Chemical Technology (now retired), Government Polytechnic, Kalamassery and the authorities of Regional Cancer Centre, Trivandrum, for allowing me to use their equipments in the early stages of my work.

My thanks are also due to the members of my family and relatives, especially to Mr. Babu Joseph who supported me morally and encouraged me in my work. I don't know how to thank my wife for her great support as well as patience and endurance, but for which, my efforts would not have been fulfilled.
