ACKNOWLEDGEMENTS

At this moment of accomplishment, first of all I express my deep sense of gratitude to my guide, Dr. Bhagyalakshmi Neelwarne, who laid a very strong foundation for my research career. This work would not have been possible without her guidance, support and encouragement. I hope that I could be as lively, enthusiastic, and energetic like her and to someday be able to guide researchers. Under her guidance I successfully overcame many difficulties and learned a lot from her.

I am also extremely indebted Prof. Ram Rajasekharan, Director, CFTRI for providing necessary infrastructure and resources to accomplish my research work.

I take this opportunity to sincerely acknowledge the Council of Scientific and Industrial Research (CSIR), Government of India, New Delhi, for providing financial assistance in the form of Junior Research Fellowship.

I gratefully acknowledge Dr. G.A. Ravishankar, Dr. R. Sarada, and Dr. P. Giridhar for their valuable suggestions and support during presentation times. And I also thank full to Dr. Nandini P. Shetty, Mrs. Karuna and other staff members, Narayan, Channa Gowda and Vijay who have always been helpful. I take this opportunity to say heartfelt thanks to Dr. V. Baskaran, Biochemistry and Molecular Nutrition Dept. for his valuable advice, constructive criticism and corrections made in my publications despite of his busy schedule.

I am thankful to P. L. Mukund and R. Hareesh during HPLC analysis in Central Instrument Facility. I acknowledge the timely help and cooperation of other supportive departments staffs.

I am grateful to my senior V. Lokesh for teaching me the basics of gene expression analysis, and other seniors for the moral support given during my tough times in my research work and lifting me uphill this phase of life.

All my friends and colleagues in the PCBT department and CFTRI have been kind enough to help and support me at all times whenever needed both in research and morally, therefore I place on record my heartfelt thanks to all these people who made my stay at CFTRI a memorable one.

Of course, thanks are due to my parents and sisters for giving me complete freedom for taking important decision in both life and selecting career, who gave me encouragement even though they don’t know much about research. I dedicate this thesis to them.

Last but not least, I would like to pay high regards to Bijesh, for his love, support and encouragement throughout my work because writing thesis is like running a long and lonely marathon.

(P. Divya)
