List of Figures

Figure -1: THC in 5th instars [both females and males]
Figure-2: DHC in 5th instars [both females and males]
Figure-3: THC in adults [both females and males]
Figure-4: DHC in adults [both females and males]
Figure-5: Effect of starvation on THC in 5th instars [both females and males]
Figure-6: Effect of starvation on DHC in 5th instars [both females and males]
Figure-7: Effect of chilling [4 c] on THC in 5th instars [both females and males]
Figure-8: Effect of chilling [4 c] on DHC in 5th instars [both females and males]
Figure-9: Effect of low temperature [15 c] on THC in 5th instars [both females and males]
Figure-10: Effect of low temperature [15° c] on DHC in 5th instars [both females and males]
Figure-11: Effect of high temperature on THC in 5th instars [both females and males]
Figure-12: Effect of high temperature [35° c] on DHC in 5th instars [both females and males]
Figure-13: Effect of saline injection on THC in 5th instars [both females and males]
Figure-14: Effect of saline injection on DHC in 5th instars [both females and males]
Figure-15: Effect of nervectomy on THC in 5th instars [both females and males]
Figure-16: Effect of nervectomy on DHC in 5th instars [both females and males]
Figure-17: Effect of wound (without application of antibiotic) on THC in adults [both females and males]
Figure-18: Effect of wound (Without Antibiotics) on DHC in adults [both females and males]

Figure-19: Effect of wound (with application of antibiotic) on THC in adults [both females and males]

Figure-20: Effect of wound (with antibiotic) on DHC in adults [both females and males]

Figure-21: Effect of irritation on THC in adults [both females and males]

Figure-22: Effect of irritation on DHC in adults [both females and males]

Figure-23: Effect of Amputation of legs in adults [both females and males]

Figure-24: Effect of amputation of legs in adults [both females and males]

Figure-25: Effect of antigen on THC in adults [both females and males]

Figure-26: Effect of antigen on DHC in adults [both females and males]
