Acknowledgements

At the outset I wish to thank my God "The all mighty" for making this thesis possible. Without HIS compassion in my career, this thesis might have remained just another fascinating Aries dream.

It is a great pleasure for me to put on record a deep sense of gratitude, from the abyss of my heart, for my beloved Professor. Dr. S. Lazarus for his incessant and sympathetic co-operation throughout the research programme. His constant unflagging back-up and affectionate support has been a source of inspiration for me to execute my Ph.D programme successfully. He has been an excellent supervisor and scientific role model.

It was Dr. D.B. James, who introduced me to sea cucumbers and I thank him well for his demonstrative advice and balanced guidance during my research at the Central Marine Fisheries Research Institute, India that helped me gain scientific and personal confidence in this exciting virgin field.

Furthermore I would like to thank Dr. P. Natarajan for his encouragement and sharing his immense knowledge during the early stages of my research.

I am extremely grateful to Dr. Christopher John, Post-doctoral Fellow, Academia Sinica, Taiwan, who gave invaluable support, continuous encouragement and advice resulting in improvements to the study. I am grateful to Dr. Vethamony, Scientist, NIO, Goa for his support and encouragements.

Dr. Anita G. Mary has been an unexpectedly wonderful and encouraging friend. Her support and care have kept me going during the last difficult months of thesis finalisation. I also thank Ms. B.Valentin Bhimba, Lecturer, Satyabhama Engineering College, Chennai and Dr. R. Anantharajan for going through the manuscript.

I am appreciative of Bluefin Secucumber Hatchery Management team, for their support and trust during this study. I acknowledge my profound gratitude and sincere thanks to the following eminents for their inspiration, encouragement and for the spontaneous help given in various ways whenever I needed.
I would like to remember and thank my Dad, Walsalam and my Mum, Daisy for their endless support and back-up during this study. I also thank my loving brother Mabel Raj, computer professional, for his constant encouragements and his support in compiling the thesis.

I would particularly like to thank my aunt Mrs. Roselet, Cousin Brother Mr. Sam and family and Co-brother Mr. Gnanadhas and family for their support and friendship, when this PhD somehow suddenly became quite difficult. I also like to extend my heartfelt thanks to Mr. John Geo and Miss. Gino Sholin for their helpfulness and companionship.

I would most importantly like to thank my loving children Christensen Beni and Winstern Beni and my brand new baby I got during my research, Christina Beni for their acceptance and patience during my frustrating times.

Thank you all once again.

Ivy
