ACKNOWLEDGEMENTS

In the present study, I have attempted to explore the cognitive development of children of primary school of Assam on the basis of the theory of Jean Piaget, a Swiss Psychologist whom I have never met but still I regarded him as a great teacher of mine and wish to express my sincere gratitude to him. However, my work will be incomplete if I do not acknowledge the help extended to me by various individuals during my years of research.

I am greatly indebted to my guide Dr. Swarnalata Das, Professor of Education Gauhati University who has supervised my work all through, and patiently helped me to solve the problems that had surfaced in the process. Inspite of her various pre-occupations, she has kindly devoted much of her precious time in helping me in every step; without which it would not have been possible to complete this work. I also wish to express my gratitude to Dr. Nandita Sarma and Dr. P.C. Das former Heads of the Department of Education and I also wish to express my note of appreciation to my colleagues for their supportive comments, valuable suggestions and co-operation to carry out my works.

I also express my sincere thanks to the staff of various libraries which I have visited for their co-operation and cheerful assistance when ever required in locating number of reference books.

I am also indebted to the staff members of the National Social Science Documentation Centre who sent the photocopies of different related materials by post in time which serve as a very useful documents for my research work. I am also thankful to all those whose books or writings were consulted in the preparation of this thesis.

My sincere thanks are also due to the Heads and teachers of different primary schools who have provided all facilities in collection of data in their institution, without which the present study would not have been possible at all. Of course the biggest vote of thanks must go to the innocent pupils who were the subjects of the study.
I wish to express my gratitude to my teachers of the Cotton College, Department of Education, for their affection and encouragement and also from whom I learnt what Education is, as a subject.

I would like to express my profound gratitude to my parents for their blessings as well as my brother and sister in law for their constant encouragement.

I appreciate the constant inspiration, encouragement and the sincere co-operation of my uncle Mr. Jahar Sensharma and my aunt Mrs. Anju Sensharma in every stages of this piece of research work for which I am grateful to them forever.

Finally I must also express my thanks to Mr. Tapan Das for the speed and accuracy with which he typed successive chapters of my thesis and Mr. Arun Agarwal M/s Classic Corner, Guwahati in taking the responsibility in presenting my thesis in the present form.
