Undertaking by Research Scholar

This is to state that this is the result of my original work. It is an attempt to find out the patterns of nutritional deficiency prevailing among women in Jorhat district, Assam. It tries to find out the geographical factors influencing such patterns of nutrition and its impacts on health. Inspite of my best efforts, the study may have certain gaps, which could not be addressed to the desired depth due to various factors beyond my control. This work or part of it has not been submitted to any other university for any Research Degree.
