<tbody>
<tr>
<td>Fig. 2.1: Location map of Barpeta District (district boundary, sub-division &amp; Circle boundary, Roads &amp; Rails, Major rivers &amp; important places)</td>
<td>27</td>
</tr>
<tr>
<td>Fig. 2.2: Relief and slope map of Barpeta District (Source: National Atlas and Tтематичні Маппінг Організація)</td>
<td>29</td>
</tr>
<tr>
<td>Fig. 2.3: Physiographic sub-divisions and drainage of Barpeta District</td>
<td>30</td>
</tr>
<tr>
<td>Fig. 2.4 Landuse/ Landcover map of Barpeta district (Source: National Atlas and Tтематичні Маппінг Організація)</td>
<td>41</td>
</tr>
<tr>
<td>Fig. 3.1(a): Variations of Annual Peak Discharge in River Beki (1974 – 2004)</td>
<td>57</td>
</tr>
<tr>
<td>Fig. 3.1(b): Variations of Annual Peak Discharge in River Manas (1973 – 2004)</td>
<td>57</td>
</tr>
<tr>
<td>Fig. 3.1(c): Variations of Annual Peak Discharge in River Pahumara (1977 – 2004)</td>
<td>58</td>
</tr>
<tr>
<td>Fig. 3.1(d): Variations of Annual Peak Discharge in River Kaldia (1973 – 2004)</td>
<td>58</td>
</tr>
<tr>
<td>Fig. 3.2 (a): Extreme Value I, Extreme Value II, log- Normal and log-Pearson Type III fit to the annual floods of river Beki (1974 – 2004)</td>
<td>63</td>
</tr>
<tr>
<td>Fig. 3.2 (b): Extreme Value I, Extreme Value II, log- Normal and log-Pearson Type III fit to the annual floods of river Manas (1973– 2004)</td>
<td>63</td>
</tr>
<tr>
<td>Fig. 3.2 (c): Extreme Value I, Extreme Value II, log- Normal and log-Pearson Type III fit to the annual floods of river Pahumara (1977 – 2004)</td>
<td>64</td>
</tr>
<tr>
<td>Fig. 3.2 (d): Extreme Value I, Extreme Value II, log- Normal and log-Pearson Type III fit to the annual floods of river Kaldia (1973 – 2004)</td>
<td>64</td>
</tr>
</tbody>

Fig. 3.3: Plots of designed floods obtained by using Log-Pearson Type-III distribution against return periods for different rivers

Fig. 3.4: Overall picture of the seasonal variation of floods in Barpeta District

Fig. 3.5 (a): Variation of monthly sediment and discharge in River Beki (May-Oct, 1988)

Fig. 3.5 (b): Variation of monthly sediment and discharge in River Kaldia (May-Oct, 1988)

Fig. 3.6(a): Sediment-Discharge relationship (monthly data) for River Beki (May – October, 1988)

Fig. 3.6(b): Sediment-Discharge relationship (monthly data) for River Kaldia (May – October, 1988)

Fig. 3.7(a): Sediment-Discharge relationship (daily data) for River Beki (July, 1988)

Fig. 3.7(b): Sediment-Discharge relationship (daily data) for River Manas (July, 1992)

Fig. 3.7(c): Sediment-Discharge relationship (daily data) for River Pahumara (July, 1988)

Fig. 3.7(d): Sediment-Discharge relationship (daily data) for River Kaldia (July, 1988)

Figure 3.8(a): Stage and Discharge hydrograph of River Beki (May – Oct, 1992)

Figure 3.8(b): Stage and Discharge hydrograph of River Manas (May – Oct, 1992)

Figure 3.8(c): Stage and Discharge hydrograph of River Pahumara (May – Oct, 1992)
Figure 3.8(d): Stage and Discharge hydrograph of River Kaldia (May – Oct, 1992)

Fig. 3.9(a): Rating Curve for River Beki (May – Oct, 1992)

Fig. 3.9(b): Rating Curve for River Manas (May – Oct, 1992)

Fig. 3.9(c): Rating Curve for River Pahumara (May – Oct, 1992)

Fig. 3.9(d): Rating Curve for River Kaldia (May – Oct, 1992)

Fig. 3.10(a): Rating curve of River Manas for the months of May – June, 1992

Fig. 3.10(b): Rating curve of River Manas for the months of July – September, 1992

Fig. 3.10(c): Rating curve of River Manas for the month of October, 1992

Fig. 3.11(a): Rating curve of River Kaldia for the month of May-July, 1992

Fig. 3.11(b): Rating curve of River Kaldia for the month of Aug-October, 1992

Fig. 4.1: Different Zones of flood prone areas of Barpeta District, Assam

Fig. 4.2: Number of flood affected villages having different frequencies during the period 1982 – 2004

Fig. 4.3: Percentage of flood affected villages in different circles of Barpeta district

Fig. 4.4: Area under different flood intensity zones in Barpeta District

Fig. 5.1: Variation of physical parameters of water in the four rivers of Barpeta district during 2004 Flood

Fig. 5.2: Variation of some chemical parameters of water in the four rivers of Barpeta district during 2004 Flood

Fig. 5.3: Variation of Total Alkalinity and Hardness of water in the four rivers of Barpeta district during 2004 Flood

Fig. 5.4: Variation of pH in soils of different flood intensity zones
Fig. 5.5: Variation of Primary Nutrients in soils of different flood intensity zones

Fig. 5.6: Variation of some Secondary Nutrients in soils of different flood intensity zones

Fig. 6.1: Mean and Maximum of Fatality Rate for Diarrhea under different PHC of Barpeta District (1987 – 2003)

Fig. 6.2: Mean and Maximum of Fatality Rate for Dysentery under different PHC of Barpeta District (1987 – 2003)

Fig. 6.3: Mean and Maximum of Fatality Rate for Gastroenteritis under different PHC of Barpeta District (1987 – 2003)

Fig. 6.4: Fatality Rate for three waterborne diseases in different Flood Intensity Zones Barpeta District (1987 – 2003)

Fig. 6.5: Number of village affected and cattle loss in Barpeta district due to flood during 1987-2004

Fig. 6.6: Number of house damage and area affected in Barpeta district due to flood during 1987-2004

Fig. 6.7: Number of population and crop area affected in Barpeta district due to flood during 1987-2004

Fig. 6.8: Percentage of crop area affected to the total flood affected area of the district during 1987-2004
