I take this opportunity to humbly convey my sincere gratitude to my revered teacher and guide, Dr. S.C. Dey, D.Sc.(Cal), FZS., Professor of Zoology, Gauhati University for suggesting this problem and arduously supervising throughout the course of investigation with his virtually unlimited and indefatigable energy.

I also do wish to express my indebtedness to Drs. M. M. Goswami of Zoology Department, Gauhati University, B. Lahon of Assam Fisheries Development Corporation, Guwahati and S. Nath of Assam Administrative Service, Govt. of Assam for giving me very willing co-operation and encouragement. Drs. Y.S. Yadav and M. Choudhary of Central Inland Capture Fisheries Research Institute, Guwahati Centre deserve special appreciation for helping me in statistical analysis of the data recorded in the present investigation. Besides, I am very much grateful to the Department of State Fisheries, Govt. of Assam for material help especially during extensive trial field investigations.

I hereby sincerely acknowledge my heartfelt gratitude to the Council of Scientific and Industrial Research (CSIR)
New Delhi for kindly awarding me a research fellowship to undertake this important investigation.

I offer my humble thanks to Sayed L. Ali and Sri P. Das, Asstt. Tourist Information Officer, Govt. of Assam for their excellent co-operation during the field work at Bhalukpong.

I deeply owe to my sister, Dorin, without whose constant encouragement the thesis would not have seen the light of the day.

My grateful thanks are due to Sri S. Roy and Sri K. Shee of Guwahati for drawing the illustrations and to Sri Kalicharan Das of Geography Department, Guwahati University for taking pains in meticulously typing the thesis.

In fine, I record my deep sense of gratitude to my parents from whom I received all help and appreciation to complete the treatise.

Guwahati, the 29 Dec., 1989

(MANINDRA DAS)
