LIST OF FIGURES

Fig. 1 Chromatogram of GLC analysis of oil sample from *Cymbopogon flexuosus* plant grown on soil ammended with 200 mg kg\(^{-1}\) lead nitrate (Hydrodistilled in winter).

Fig. 2 Chromatogram of GLC analysis of oil sample from *Cymbopogon flexuosus* plant grown on soil ammended with 300 mg kg\(^{-1}\) lead nitrate (Hydrodistilled in summer).

Fig. 3 Chromatogram of GLC analysis of oil sample from *Cymbopogon flexuosus* plant grown on soil ammended with 500 mg kg\(^{-1}\) lead nitrate (Hydrodistilled in summer).

Fig. 4 Chromatogram of GLC analysis of oil sample from *Cymbopogon flexuosus* plant grown on unammmended soil (Hydrodistilled in summer).

Fig. 5 Chromatogram of GLC analysis of oil sample from *Cymbopogon flexuosus* plant grown on unammmended soil (Hydrodistilled in winter).

Fig. 6 Chromatogram of GLC analysis of oil samples from *Cymbopogon flexuosus* plant grown on soil ammended with 50 mg kg\(^{-1}\) mercuric nitrate (Hydrodistilled in summer).

Fig. 7 Chromatogram of GLC analysis of oil samples from *Cymbopogon flexuosus* plant grown on soil ammended with 500 mg kg\(^{-1}\) mercuric nitrate (Hydrodistilled in winter).

Fig. 8 Chromatogram of GLC analysis of oil samples from *Cymbopogon flexuosus* plant grown on soil ammended with 500 mg kg\(^{-1}\) mercuric nitrate (Hydrodistilled in summer).

Fig. 9 Chromatogram of GLC analysis of oil samples from *Cymbopogon flexuosus* plant grown on soil ammended with 100 mg kg\(^{-1}\) cadmium nitrate (Hydrodistilled in summer).

Fig. 10 Chromatogram of GLC analysis of oil samples from *Cymbopogon flexuosus* plant grown on soil ammended with 100 mg kg\(^{-1}\) cadmium nitrate (Hydrodistilled in winter).

Fig. 11 Relationship between seasonal changes (Temperature) and impact of lead on growth index over four seasons.

Fig. 12 Relationship between seasonal changes (Rainfall) and impact of lead on growth index over four seasons.
Fig. 13 Relationship between seasonal changes (Relative humidity) and impact of lead on growth index over four seasons.

Fig. 14 Relationship between seasonal changes (Temperature) and impact of lead on oil content over four seasons.

Fig. 15 Relationship between seasonal changes (Rainfall) and impact of lead on oil content over four seasons.

Fig. 16 Relationship between seasonal changes (Relative Humidity) and impact of lead on oil content over four seasons.

Fig. 17 Relationship between seasonal changes (Temperature) and impact of mercury on growth index over four seasons.

Fig. 18 Relationship between seasonal changes (Rainfall) and impact of mercury on growth index over four seasons.
