ACKNOWLEDGEMENT

I wish to express my deepest sense of indebtedness and earnest appreciation to my guide and main advisor Dr. K. Devadasan, Director (Retd.), Central Institute of Fisheries Technology, Cochin for always being a great source of inspiration. His many helpful suggestions, timely advice and constant encouragement during the course of this work are gratefully acknowledged. I am deeply indebted to Dr. B. Mennakumari, Director for her support and for providing the facilities needed to carry out this study.

I feel great happiness in expressing my thanks and gratitude to Dr. P. G. V. Nair, Head (Retd.), Biochemistry & Nutrition Division, Central Institute of Fisheries Technology, Cochin who had readily made all the facilities in the Division available to me for completion of this work. I particularly appreciate his abiding interest in the progress of my work and his helpful suggestions and encouragement. Dr. P.T. Lakshmanan, Head, Biochemistry & Nutrition Division, Central Institute of Fisheries Technology, Cochin has always been kind with his advice and support.

Dr. T. V. Sankar, Senior Scientist, and Dr. Suseela Mathew, Senior Scientist, have been nice and gentle throughout and I am glad to thank them for their help and suggestions. Dr R. Anandan, Senior Scientist, Biochemistry & Nutrition Division is profoundly thanked for all the valuable ideas, constructive advice and deep interest he showed in this study and particularly for egging me on to complete this work.

I would like to place on record my sincere thanks to Dr. Mohan Joseph Modayail former Director, CMFRI for granting me permission to carry out the histopathological studies in CMFRI.
I greatly appreciate the effort and pains taken by Shri. B. Ganesan and Shri, M. N. Sreedharan of the Institute’s Animal House, for assisting me in using albino rats. Dr. Usha Rani, Shri. K. V. Mathai, Smt. G. Ramani, Shri. T. Mathai, Smt. P. A. Jeya, Smt. N. Lekha, Smt. Tessy Francis, and Shri. P. A. Sivan of the Division have always extended technical/ secretarial assistance throughout the period of work. It is my pleasure to heartily acknowledge their help.

Several students, who had been and are presently working as SRFs/ Technical Assistants in the Biochemistry & Nutrition Division of CIFT, readily extended assistance whenever needed. They are all thankfully remembered.

There are several other friends and senior colleagues in the Institute who have been kind with their words and support, but haven’t been thanked here; instead they are in my heart. My late father has been a steady support throughout my life, constantly encouraging me in all I do. I owe to him everything I have today. I also thank my dear brother for the person he is. My parents-in-law have been with me through the highs and lows of life and their support has made a lot of things possible for me. I am deeply indebted to my husband and children for their love, support and above all their time without which this thesis would have remained incomplete still. Above all, I thank the Almighty for being with me in every step of my life.

K.K.ASHA
