ACKNOWLEDGEMENT

Completion of my thesis calls for an expression of indebtedness to all those who supported, encouraged and helped me during my doctoral research.

With hands folded in prayer, I thank God Almighty for carrying me in the palm of His hand, for guiding me right, for helping me overcome all trials and tribulations, for keeping me spiritually strong, intellectually equipped and leading me to a successful finish.

My heart goes out in gratitude to my research supervisor Prof. N. Sundaraganesan, Department of Physics, Faculty of Engineering and Technology, Annamalai University, whose unfailing concern, interest and encouragement helped me delve deep into the subject, understand it better and use it to my advantage. I remain ever indebted to him for his timely guidance, his patient understanding of my problems, and his sincere help. I am also indebted to him for patiently going through the various versions of my thesis and for his critical comments.

I am highly grateful to Prof. S. Barathan, Head, Department of Physics, Annamalai University, for giving me the excellent opportunity to carry out my research work in the Department of Physics and providing me the entire infrastructure, required facilities and for providing financial assistance in the form of University Fellowship during the course of this research. His constructive comments and moral help during all aspects of this work have provided a good basis for the present thesis.

I wish to thank gratefully Prof. B. Rajamannan, Department of Physics, Faculty of Engineering and Technology, Annamalai University, for his comprehensive suggestions to my research.

My sincere thanks go to Dr. S. Kalaichelvan, Registrar, Tamil Nadu Teachers Education University, Chennai, for his enlightening suggestions, support and encouragement.

I express my deep sense of gratitude to Dr. H. Saleem, Associate Professor of Physics, Dr. P. Chinnababu, Assistant Professor of Physics, FEAT, Annamalai University, for their sound advice and help along the way. I am grateful to all the Staff Members of the department of Physics, Annamalai University for their support and encouragement in my endeavors.

I owe a lot to Dr. A. Manimegalai, Former Professor and Head, Department of Chemistry, Dr. S. Kabilan, Professor, Department of chemistry, Dr. B. Karthikeyan, Assistant Professor of Chemistry, Dr. B. Manicavasagam, Deputy Warden, Research Scholars Hostel and Dr. S. Manoharan, Associate Professor of Biochemistry, Annamalai University, for their help, support and encouragement.

My special thanks to Prof. Michał H. Jamróz, Institute of Nuclear Chemistry and Technology, Warsaw, Poland, for his training and expertise in VEDA program and noteworthy of his numerous discussions about PED calculation.

I extend my sincere thanks to Dr. S. Sudha, Dr. S. Sebastian and Dr. M. Amalanathan and My research colleagues Ms. S. JonePradeepa, Mr. R. Govindarasu for warm support and cooperation.
A large debt of gratitude is owed to our colleagues at Annamalai University especially Dr. G. Thinuppathi, Dr. A. Raja, Dr. S. Cholan, Dr. Sri NithyaNaresanandha, Mr. B. Loganathan, Mr. R. Gopalakrishnan, Mr. K. Thirumooorthy, Dr. A. Sethukumar, Mr. M. Gohulkumar, Mr. V. L. Chandraboss, Mr. K. Gokulkumar, Dr. P. Jeeranandam, Mr. C. Loganathan, Mr. P. Dhatshanamurthi, Mr. D. Chinnaraja, Mr. S. Dinesh, Mr. S. R. Gibin, Mr. S. Adasvan, Mr. Joby Jose, Mr. M. Anandan, Mr. K. Gurusankar, Dr. M. Rajeshkumar, Dr. A. Sethuskumar, Mr. M. Gohulkumar, Mr. K. Thirumoorthy and Mr. L. Guganathan.

I am extremely grateful to Mr. M. Velayutham Pillai and Ms. M. Sameera has gone through the thesis very carefully his comments and suggestions have been very useful in improving the quality of the thesis.

I am grateful to Prof. B. Shanthi and Dr. G. Sivakumar, Associate Professor, Centralized Instrumentation and Service Laboratory (CISL), Department of Physics, Annamalai University for recording Ultra-Violet visible study. I am indebted to Sophisticated Analytical Instrument Facility (SAIF), IIT Madras, Chennai, for recording FT-IR and FT-Raman characterizations of the present research work.

My deepest gratitude goes to my dear parents, Mr. K. Gopal and Mrs. G. Sivagami, whose countless sacrifices in life for their children allowed me to reach this point. Their unfathomable love and support made me to achieve many things that otherwise would be impossible. I want to extend them my heartfelt thanks for all they have done and gone through for me. My dear sister, Mrs. G. Thangamani deserves special mention for her loving and indispensable support. I owe my loving thanks to my dear cousins specially Mrs. A. Malarvizhi and Ms. S. Sasikala for their well wishes and refreshing talks.

I feel extremely fortunate to have all my friends; they are unsung heroes in my life, particularly Mr. M. Sasikumar, Mr. D. Manimaran, Mr. S. Arunagiri, Mr. A. Rajbharath, Mr. K. Mathivanan, Mr. R. Suresh and Mr. R. Premkumar for all the relaxing and invigorating moments. Mr. M. Danasekaran, Mr. R. Venkateswaran, Mr. P. Nagarajan and Mr. B. Senthilmurugan, our friendship during the undergraduate years has been invaluable to me and it has helped me through many dark moments that every researcher encounters.

Some of you, my dear friends and members of the family who helped me in numerous ways may be shocked to find your names missing in this list of indebtedness. It does not mean that my gratitude to you is less but rather more for your generous gesture. Its mere words I have to convey my profound gratitude to each one of you.

I also thank the University Grants Commission, New Delhi, India for granting me Fellowship under the scheme of major research project.

G. Mariappan
