LIST OF TABLES

CHAPTER 1
1.1 List of primary coagulation factors involved in blood coagulation cascade

CHAPTER 2
2.1 Proteolytic activity of King Cobra venom with protease specific inhibitors; PMSF, EDTA and 1, 10-Phenanthroline.

CHAPTER 3
3.1 Effect of four venoms O. hannah, N. naja, V. russellii and E. carinatus on the bleeding time in mouse model
3.2 Plasmin-like activity of four venoms.
3.3 IC_{50} values for D. russellii, N. naja and O. hannah venoms for their inhibition on agonists induced platelet aggregation in PRP.

CHAPTER 4
4.1 Inhibition of lethality of O. hannah venom (2 LD_{50} dose) with increasing amount of BSV, VB & OH-IgG antivenoms.

CHAPTER 5
5.1 Effect of specific protease inhibitors (5 mM concentration each) on the activity of protease.
