COGNITIVE STYLE INVENTORY

(Indian Adaptation)

Parveen Kumar Jha (Bihar)

Please fill in the following information

Name......................................................... Class...........................................

Sex............................................................ Age............................................

Location (Urban/Rural).........................Name of School.................................

Instructions

This inventory consists of two parts with twenty statements in each part. Five point scale as totally disagree, disagree, undecided, agree and totally agree are given against each statement.

Answer the questions frankly and truthfully. There is no advantage in giving an untrue answer about yourself. Tick in an appropriate box, but do not spend too much time while answering the questions. Use the middle answer only when it is absolutely impossible to decide on one of the other choices. Don’t skip any question. Though there is no time limit, still try to answer all statements quickly.

Scoring Table
