LIST OF PLATES

PLATE 4.1 Photomicrograph of Bagasra Fabric Group A showing the calcareous nature of the matrix with quartz and feldspar as nonplastic inclusions. Field of view: 0.686 sq.mm (at X10) .......................... 187

PLATE 4.2 Photomicrograph of Bagasra Fabric Group A I showing the birefringence and angular to subangular shape of quartz .......................... 188

PLATE 4.3 Photomicrograph of Bagasra Fabric Group B showing poorly sorted ferruginous fabric with crushed basalt pieces .......................... 189

PLATE 4.4 Photomicrograph of Bagasra Fabric Group B I showing iron oxide patches, crushed rocks and augite are also seen .......................... 190

PLATE 4.5 Photomicrograph of Bagasra Fabric Group C showing ferruginous fabric with quartz and calcite as part of matrix. Angular to subangular shaped quartz and aggregated calcites moderately sorted .......................... 192

PLATE 4.6 Photomicrograph of Bagasra Fabric Group C I showing the fine quartz-calcareous nature of the matrix with mica being part of the matrix .......................... 193

PLATE 4.7 Photomicrograph of Bagasra Fabric Group D showing coarse fabric with quartz at the centre. Voids in the form of grain fallout can also seen .......................... 196

PLATE 4.8 Photomicrograph of Bagasra Fabric Group E showing ferruginous materials mixed with calcareous fabric. Quartz, altered feldspar and iron oxide patches can be seen .......................... 197

PLATE 4.9 Photomicrograph of Bagasra Fabric Group F, showing fine ferruginous quartz-mica fabric. Longitudinal mica showing more or less parallel orientation .......................... 202

PLATE 4.10 Photomicrograph of Bagasra Fabric Group G showing coarse fabric with moderate to well sorted inclusions (F.S-M.S). Minerals seen are altered feldspar and quartz .......................... 203

PLATE 4.11 Photomicrograph of Bagasra Fabric Group H showing preferred orientation of mica, quartz and patches of crypto-crystalline calcite are also seen .......................... 204

PLATE 4.12 Photomicrograph of Bagasra Fabric Group I showing the sub-rounded to rounded bioclasts .......................... 205

PLATE 4.13 Photomicrograph of Bagasra Fabric Group J showing poorly sorted fabric with plagioclase feldspar, crypto-crystalline calcites and quartz .......................... 207
