ACKNOWLEDGEMENTS

A journey is easier when we travel together. Interdependence is certainly more valuable than independence. This thesis is the result of five and half years of work whereby I have been accompanied and supported by many people. It is a pleasant aspect that I have now the opportunity to express my gratitude for all of them. There is a strong temptation to individually acknowledge everyone who has helped me to reach this point. Sadly, such a list would be much too long and it is inevitable that many people would be unintentionally omitted. I would thus like to thank everyone who, knowingly or otherwise, has provided support, encouragement and assistance along the way. However, there are others who have played a major role in the production of this thesis and who deserve a more personal note of gratitude.

First of all, I express my deep sense of gratitude to my thesis supervisor Dr. C. V. Devasia for his invaluable guidance, and providing me motivation and enthusiasm through out the duration of this thesis work. It was a great pleasure for me to work under his supervision. Without his continuous support and patience, it would have been extremely difficult to complete this work.

I am extremely grateful to Dr. A. K. Patra, now at National MST radar facility, Gadanki, Tirupati for his keen interest and constant encouragement. It is a pleasure to work with him. During these years I have known him as a sympathetic and principle-centered person. His overly enthusiasm and integral view on research and his mission for providing 'only high-quality work and not less', has made a deep impression on me. I owe him lots of gratitude for showing me this way of research. I have gained a lot by many useful discussions during his stay at SPL. I am extremely thankful to him for sparing his valuable time and going through my thesis and making useful corrections and suggestions. Without him, I doubt that this thesis would ever have been written.

I am grateful to Prof. R Sridharan, Director, Space Physics Laboratory, for his constant encouragement, valuable suggestions and deep concern in the progress of my research work. He has always been a source of inspiration for me, who kept an eye on the progress of my work and always was available when I needed his advises. His scientific spirit, vision, clarity and command in the understanding of earth's ionosphere-thermosphere processes have helped me to visualise the existing challenges in my research area. His scientific curiosity, encouragement, and guidance through out this work have been necessary for this thesis. His sincere advice on many facets of life will go a long way.

The very many enlightening scientific and non-scientific discussions I had with Dr. Tarun K. Pant still linger in my mind. It has been a pleasure to know and associate with him. He cannot even realize how much I have learned from him. Besides of being an excellent teacher, he was as close as a relative and a good friend to me. I am really glad that I have come to know him in my life. I would like to thank Drs. Anil Bhardwaj, K. Rajeev and Suresh Raju, for our many stimulating discussions, providing me brotherly advices and tips that helped me a lot in staying at the right track.
I am very much thankful to Prof. D. N. Rao, Director national MST radar Facility, Gadanki, Tirupati, and his colleagues for providing me an excellent work environment and facility during my stay at NMRF.

I am happy to mention here, my deep gratitude to International Centre for Theoretical Physics (ICTP), for providing me an excellent opportunity to participate in the 3rd international school on atmospheric radars, held at Tristie, Italy, which has certainly helped to widen my perspective on the subject. I consider it as a great privilege to listen to the enlightening lectures on various aspects of radar techniques, and for the training in lab work given by Prof. J. Roettger, Prof. D. N. Rao, Prof. S. Fukao, Prof. R. D. Palmer, Prof. P. B. Chilson and Prof. S. M. Radicella and for the stimulating discussions I had during my stay there, which helped me to improve my understanding about radar techniques.

I am deeply indebted to Sri Muraleedharan Nair, for introducing me to the world of 'Matlab', which played a very important role in the computer programming part of my thesis. Without his support, the magnitude of this task would have been much greater.

I would like to give my sincere thankfulness to former head 'Atmospheric technology division', Sri K. V. Janardhanan for teaching the fundamental aspects of the atmospheric radar and encouragement during the research work. I wish to thank Sri S V Mohan Kumar, and Sri D R K Ramakrishnarao for having useful discussion on digital signal processing. I sincerely acknowledge Uttam S Purity, Shajahan, P Ayyapan, Sarala, and Johnson for their help rendered during the course of observations.

I am very much thankful to Dr. K. S. Viswanathan, Dr. K. S. V. Subbarao, and Dr. Sudha Ravindran for their constant help, support and suggestions to improve the understanding on the basic ionospheric processes.

I am grateful to the 'Ph. D Academic committee of SPL' who monitored my work and took effort in providing me with valuable comments, suggestion and for showing so much of care towards the improvement of my career. I thank Dr. K. Krishna Murthy, Dr. M. N Sasi, Dr. Anil Bharadwaj, Dr. Kunhikrishnan and Dr. K. S. Viswanathan for their valuable feedback critical comments and constructive criticism during my assessment reviews for the improvement of my work.

My thanks are due to my colleagues and friends Dr. M V Ramana, Dr. Marykutty Michael, Dr. V. Deepa, Jyoti, Veerabuthiran, Subrahmanyam, Auromeet, Praveena, Preetha, Sandhya, Sunil, and Suresh Babu. The association and friendship I had with Rakesh Rai, Darakhshan, Vinay Pandey, Hariya, Jagga, Parru, Jiwan Pandit, Sripati, Aveek, Vijaya, Vino, Vivek, Siddarth, Korak, Vineeth, Mariya, Sushan, Madhu and Kiran are ever to be cherished.

A special thanks goes to Smitha, who showed what it is to be a kind, helpful and a trustworthy friend.

I am also grateful to the administrative staff at SPL for their help and cheerful assistance during the past years. Thanks are due to the staff at the VSSC Library for providing the reprographic facility and assistance, which was much needed.
I express sincere gratitude to Sri B. P. Patel, Dr. Manju Mitra, Dr. M. S. K. Khokhar, Prof. L. N. Pandey, Dr. R. S. Kher, Dr. Kalyani Verma, Dr. R. K. Saxena, and Dr. D. Singh for their various suggestions, invaluable support, help, and encouragement during my +2 and M. Sc. Degree courses. To Sri D. N. Mehar and Sanjay Vadhera, I owe thanks beyond measure for their tremendous help and logistic supports, making it possible for me to stay at Bilaspur and continue my studies.

I express my heartful appreciation and thanks to Mr. Antony who has provided me a home away from home during my stay at Trivandrum.

Last but not least, I feel a deep sense of gratitude for my parents who formed part of my vision and taught me the good things that really matter in life. I am grateful to my three brothers Bhaskar, Prabhakar and Santosh, for rendering me the sense and value of brotherhood. I am glad to be one of them. My deepest thanks go to my sister-in-laws Vandana and Saraswati for their unconditional love and support.
