Acknowledgement

Several people and institutes contributed to the preparation of the present thesis. It is prepared under the generous guidance from my Ph.D. supervisor Prof. (Dr.) Haresh V. Dedania, Department of Mathematics, Sardar Patel University (SPU), Vallabh Vidyanagar. I have had several discussions on the topics of the dissertation with Prof. S. J. Bhatt FASc, Department of Mathematics. Prof. Rajesh Sanghvi, my colleague in the Department of Mathematics, G. H. Patel College of Engineering & Technology (GCET), Vallabh Vidyanagar, contributed through several discussions pertaining to MADM methods. Prof. (Dr.) A. B. Patel, Head, Department of Mathematics, SPU, extended all facilities from the department, in particular, library facility during my Ph.D. studies; and Dr. H. B. Soni, Principal, GCET, facilitated my study by making available computational facilities as well as valuable suitable time slots for my frequent visit to the Mathematics Department, SPU. I also have had occasional mathematical discussion with Dr. Sanjay J. Ghevariya, Dr. D. J. Karia, Dr. A. H. Hasmani, and Dr. P. A. Dabhi all from Mathematics Department, SPU. Frequently I have consulted my colleagues to GCET as well as professors of Department of Mathematics, SPU for mathematical discussions. They were all more than eager for that.

I gratefully acknowledge the supports from these individuals. It is my pleasure to thank all these people.
I am very much thankful to Charutar Vidya Mandal, in particular GCET run by the mandal, for inspiring and facilitating my studies during my Ph.D. The Mathematics Department of SPU, where the present research has been carried out, extended all facilities.

I also gratefully acknowledge the support extended by these institutions.

The members of my extended family have stood with me during my studies. My feelings to them cannot be expressed in words. And so to Him Whom I bow down for the grace He is.

अ भूर्यां: स्व: तत्सवितुवरेण्यं। भगोदेवस्य धीमहि: धीयो यो न: प्रचोदयात्॥
