Acknowledgements

A long journey has come to a destination. Without acknowledging those who has helped me throughout the journey, this thesis could not be completed.

First of all, I would like to express my deep gratitude to my supervisor Prof. N. B. Ramachandra who has been the source of inspiration and motivation throughout the whole journey. I thank him for providing me the privilege to work under his guidance and encouragements to accomplish the journey. I am deeply indebted for his continuous unconditional supports despite of all his busy schedules.

Without the help of Dr. Upendra Nongthomba, Associate Professor, Molecular Reproduction, Development and Genetics, Indian Institute of Science, Bangalore, who has given me the complete freedom to conduct all the experiments based on which the frame of this thesis work has been constructed, I would have not possibly been able to accomplish this work. No words will ever be sufficient enough to thank him for his unconditional support throughout the whole journey. I owe him for what I have learned today or the understanding of science. His lab has given me everything I needed.

Prof. John C Sparrow, University of York, York, United Kingdom, has been a source of inspiration and encouragement throughout the whole journey. I am deeply indebted to him and his wife Mrs. Sue Sparrow for their utmost care and advice not only in science but also during the time of my personal crisis.

I extend my thanks to Prof. H. N. Yajurvedi, present Chairman, for providing me with the facilities and allowing me to carry out my research work in the Department. I also thank the former chairpersons, Prof. S. N. Hegde, Prof. S. R. Ramesh, Prof. Shivabasavaiah, Prof. Prakash R. Naik, , Prof. Sadananda M Yamakanamardi and Prof. V. A Vijayan. I am thankful to Prof. S. R. Ramesh, Chairman BOS in Zoology. I am also thankful to all my teachers, Dr. B. V. Shyamala, Dr. S. S. Malini, Dr. M. S. Krishna, and Dr. V. Shakunthala for their encouragement during my stay in the department. I also thank all the non-teaching staffs of the department as well the University of Mysore for their help.
I thank all my past and present friends and colleagues of both the Genetics and Genomics laboratory and Unit on Evolution and Genetics lab - Dr. Mahdi Bijan Zadeh, Ms. Bijaya Th, Mrs. Ranjini MS, Dr. Kusuma L, Mrs. Parisa Davoodi, Dr. Shyamala KV, Mr. Anand S, Mr. Avinash MV, Ms. Marita Priya, Ms. Radhika P, Ms. Sangeetha V, Ms. Sareh R J, Ms. Megha M, Mr. Raviraj VS, Mr. Somanna, Ms. Ranjita Th, Ms. Shruthi and Ms. Prithi for all the help and support during my research.

I thank all the past and present members of my large group in IISc, Bangalore who has made my stay in the lab as well in the campus pleasant and comfortable. Hena, Shital, Mohan, Momzie, Subhash, Arunita, Aditi, Smrithi, Neethu, Latha, Susheel, Aparna, Prajakta, Ameek, Shreya, Reena, Neha, Ruchi, Katti, Madhangi, Prabodh, Esha, Debasish, Saroj, Ketaki, Yoirentomba, Thangal and Renuka (Lab Manager) are some of the labmates. I miss my good friends Divesh and Swati who has left this world untimely. I thank Obalesh and Sendil for their help in making fly media to keep the flies happy.

I thank the Chairman, MRDG, IISc for allowing me to utilize all the central facilities available in the department. I thank the confocal facility in IISc and caretakers – Meenakshi and Deepthi. I thank Prof. Mahadevan and Prof. Arunkumar for their help.

I thank some of my friends off the lab/campus without whose supports it would have been very difficult for me to complete the journey – Mr. K. Bankimchandra, Mr. H. Bisheshwor, Mr. Bopanna and Mr. Manivannan.

My family has been the source of strength – my father (late) Mr. Hemchandra, my mother Mrs. Tombi Devi, my sisters – Ms Sangeena and Ms. Selena and my brother – Mr. Satishchandra. No words can ever match the dedication of my beloved mother.

Last but not the least, the fly and whole fly community.

Thank you ‘fly’ for letting us play in your genome world.

Herojeet
