Acknowledgement

A large group of people has contributed to this thesis, and without their great support in various ways, it would simply not have been possible to accomplish the research work. First and foremost, I express my gratitude to my Ph.D. supervisor, Professor K. N. Joshipura for his continuous support, scientific guidance and many inspiring discussions throughout the Ph.D. program. He was always there to listen and to give advice. He showed me different ways to approach a research problem and the need to be persistent to accomplish any goal. He smartly gave answers to my questions and also at the end of the discussions made me unveil the new aspects of the problem. I am sincerely thankful for his assistance and understanding in matters of academic-non academic concern which have helped me to endure some difficult times during my study period.

I am extremely thankful to Prof. A. R. Jani, Head of the Department-Physics, for providing me excellent facilities in the department. It is a great pleasure of mine to express my respectful acknowledgement of his invaluable guidance, nourishing encouragement and immense help.

I am thankful to my senior colleague-cum-friend Dr. Sumona who shared with me her knowledge on many aspects of the theoretical methodology and provided useful suggestions and friendly encouragement. I convey my sincere thanks to my other research group mates Purvi, Harshit, Pooja, Manisha, Siddharth, Umang, Mohit and Ravi who were instrumental in supporting me during my research.

I also express my thanks to all teaching and non-teaching staff members of Physics Department and Sardar Patel University for providing necessary academic and administrative help.

My sincere thanks are due to Dr. Minaxi madam, Dr. Chetanbhai and Dr. Bhushitbhai who were always with me as a helping hand. I like to thank Dr. Hemal (UK) for his helpful guidelines about the low energy work.
I extend my earnest thanks to Dr. Himashu B Soni, Principal, G H Patel College of Engineering and Technology (GCET), Vallabh Vidyanagar for granting me the necessary permission for attending international/national conferences as a part of my Ph.D. programme. I am also thankful to Dr. Chintan Modi, Head, EC Department, GCET and my all colleagues and co-workers, especially Smita madam for their valuable support, help and good will.

My parents, Dr. Kapilaben and Ashwinkumar Shelat, receive utmost gratitude and love for their constant support and prayers during my research. It was their dream that motivated me for this research work. I am deeply indebted to my in-laws, Smitaben and Shekharbhai Joshi who always backed me with warmth. Their loving support and care made this thesis possible.

I am also grateful to my aunties, namely Shobha – Jayamasi, who are a constant source of inspiration for all my academic endeavors. I am thankful to my in-laws Shefali and Sminesh Bhatt and cousins Janki and Kosha for their unconditional backing. Thanks to my whole Dr. Bhanuprasad Shelat, Harshadray Joshi & Sanatkumar Pandya family for their continuous and loving support. My Sincere thanks to my friends Jigisha and Shreya for their moral support.

Finally I convey my sincere thanks to my husband Milind, without whom this thesis was not possible. He was always there for moral support and stimulating suggestions which helped me in beating the challenges of my Ph.D. life. His live, loving and friendly care far exceeds any word of appreciation. Language cannot express my gratitude towards him.

With regard to all my academic activities, in addition to getting much pleasure throughout this research journey, I have greatly enjoyed my years as a research student and wish to continue that in my future research career.
