ACKNOWLEDGEMENT

The author is greatly indebted to Dr. P. Ananthakrishna Nadar, Professor of Chemistry, Anna University, Madras who suggested and supervised this investigation. His keen interest, inspiring guidance, constant encouragement and timely advice throughout the course of this work were of immense help to the author. This thesis is an outcome of his active participation and valuable discussion.

The author gratefully thanks the Department of Science and Technology, New Delhi for the financial assistance in the form of a Junior Research Fellowship.

The author sincerely thanks Dr. P. Natarajan, Professor and Head of Inorganic Chemistry, University of Madras for his kind help.

The author expresses his thanks to Dr. V. Krishnasamy, Professor of Chemistry, Anna University and also the staff members of Chemistry Department especially Mr. V. Murugesan, Lecturer in Chemistry for their cooperation.

The author thanks the Neyveli Lignite Corporation, Neyveli, for samples.
