LIST OF TABLES

Table 1: Distribution of the Sample by Type of Colleges and Age Groups .......................... 112
Table 2: Distribution of Sample by Type of Colleges and Gender ....................................... 113
Table 3: Distribution of Sample by Type of Colleges and Religions of Students ...................... 114
Table 4: Distribution of Sample by Type of Colleges and Family Member ............................ 115
Table 5: Distribution of Sample students by Education of their Fathers and Type of Colleges 116
Table 6: Distribution of Sample by Education of Students’ Mothers and Type of Colleges ..... 117
Table 7: Distribution of Sample of Students by Occupations of their Fathers and Type of Colleges ................................................................................................................ 118
Table 8: Distribution of Sample Students by Occupations of Students’ Mothers and Type of Colleges ................................................................................................................ 119
Table 9: Distribution of Sample Students by Family Income and Type of Colleges ............... 120
Table 10: Distribution of Sample Students by Types of Accommodation and Type of Colleges .................................................................................................................. 121
Table 11: Distribution of Sample Students by Amount of their Pocket Money and Type of Colleges .................................................................................................................. 122
Table 12: Distribution of Sample Students by the Level of Satisfaction with their Pocket Money and Type of Colleges ..................................................................................... 123
Table 13: Correlation between PWB and Optimism ................................................................ 125
Table 14: Correlation between Social Factors and Components of Psychological Well-Being 125
Table 15: Relationship between Social Factors and total Psychological Well-Being (Regression) ...................................................................................................................... 126
Table 16: Relationship between Social Factors and Psychological Well-Being (ANOVA) ...... 127
Table 17: Relationship between Social Factors and Psychological Well-Being ....................... 128
Table 18: Mean total PWB Scores of Students with their Fathers’ Educational level and results of One-way ANOVA ................................................................................................. 129
Table 19: Difference between each pair of Means total PWB Scores of Students with their Fathers’ Educational level ...................................................................................... 130
Table 20: Mean total PWB Scores of Students with their Mothers’ Educational level and results of One-way ANOVA ................................................................. 131
Table 21: Difference between each pair of Means total PWB Scores of Students with their Mothers’ Educational level ........................................................................................................ 132
Table 22: Mean total PWB Scores of Students with their Fathers’ Occupations and results of One-way ANOVA ........................................................................................................ 133
Table 23: Difference between pair of Means total PWB Scores of Students with their Fathers’ Occupations ........................................................................................................ 134
Table 24: Mean total PWB Scores of Students with their Mothers’ Occupations and results of One-way ANOVA ........................................................................................................ 135
Table 25: Mean total PWB Scores of Students with Income of their Families and results of One-way ANOVA ........................................................................................................ 136
Table 26: Difference between pair of Means total PWB Scores of Students with Income of their Families ........................................................................................................ 137
Table 27: Mean of LOT-R Scores of Students with Educational level of their Fathers and results of One-way ANOVA ........................................................................................................ 138
Table 28: Difference between each pair of Means LOT-R Scores of Students with Educational level of their Fathers ........................................................................................................ 139
Table 29: Mean of LOT-R Scores of Students with Educational level of their Mothers and results of One-way ANOVA ........................................................................................................ 140
Table 30: Difference between each pair of Means LOT-R Scores of Students with Educational level of their Mothers ........................................................................................................ 141
Table 31: Mean of LOT-R Scores of Students with Occupations of their Fathers and results of One-way ANOVA ........................................................................................................ 142
Table 32: Difference between each pair of Means LOT-R Scores of Students with Occupations of their Fathers ........................................................................................................ 143
Table 33: Mean of LOT-R Scores of Students with Occupations of their Mothers and results of One-way ANOVA ........................................................................................................ 144
Table 34: Mean LOT-R Scores of Students with Income of their Families ................................................................................................................................. 145
Table 35: Difference between each pair of Means LOT-R Scores of Students with Income of their Families ........................................................................................................ 146
Table 36: Relationship between Social Factors and Optimism (regression) .......................... 146
Table 37: Relationship between Social Factors and Optimism (ANOVA) .......................... 147
Table 38: Coefficient between Optimism and Social Factors ........................................ 148
Table 39: Difference between total PWB and Gender .................................................... 149
Table 40: Difference between Optimism and Gender ..................................................... 149
Table 41: Difference between the level of Students’ PWB and their level of Family Relationships .................................................................................................................... 150
Table 42: Difference between the level of Students’ Optimism and their level of Family Relationships ......................................................................................................................... 150
Table 43: Difference between the level of Students’ PWB and their level of Religious Belief ................................................................. 151
Table 44: Difference between the level of Students’ Optimism and their level of Religious Belief ......................................................................................................................... 151
