Acknowledgements

First and foremost, I owe my profound gratitude and ever remain deeply indebted to my beloved teacher and research guide Dr. K. S. Rangappa, Professor, Department of Studies in Chemistry, University of Mysore, Mysore- 570006 and Vice Chancellor, Karnataka State Open university, Manasagangotri, Mysore-570006 whose inspiration, encouragement and scholarly guidance helped me to complete this research work. Sir’s helpful suggestions, constant encouragement, valuable guidance, keen interest, warm cooperation and overall moral support helped me to complete the thesis and to see the light of the day. I wish to express my sincere, hearty and grateful thanks to him.

I am grateful to Honorable Vice-Chancellor and also Registrar, University of Mysore for permitting me to undertake my research in this prestigious University.

I am indeed indebted to Dr. D. Channegowda, Chairman, DOS in Chemistry, Manasagangotri, Mysore, for his encouragement and valuable cooperation in doing this research work.

I wish to record my sincere thanks to all the Faculty and staff of Chemistry Department, University of Mysore for their encouragement and cooperation in the preparation of this thesis.

I would like to place on record my sincere regards to Dr. K. Vinaya for his valuable suggestions and guidance to incorporate many insights to this research work.

My sincere thanks are also due to Dr. D. S. Prasanna, who has given many valuable suggestions in completing this research work.

Collective and individual acknowledgments are also due to my senior fellow-researchers, whose presence was somehow perpetually refreshing,
helpful, and memorable. Many thanks go in particular to Dr. C. S. Ananda Kumar, Dr. S. R. Ranganatha, Dr. S. Chandrappa, Dr. H. Raju, Dr. D. Asha, Dr. Y. C. Sunil Kumar, Dr. K. Mantelingu, Dr. M. P. Sadashiva, Dr. Ali Saberi, Mr. B. Krishnamurthy, Mr. Raghav. B, Mr. Rakesh. K. S and Mr. T. R. Swaroop for giving me such a pleasant time when working together with them since I came to know them in Mysore.

My sincere thanks to Dr. Sathees C. Raghavan, Department of Biochemistry, Indian Institute of Science, Bangalore, India for helping me to get the biological activities to my compounds.

I express my thanks to my lovely friends Dr. Masumeh Moghimi, Dr. Somayeh Haji Soleimani for their encouragement and help in the submission of my thesis to the University.

I am grateful to my Sisters Fariba, Hamideh, Sima and Azar Teimoori who shared my agonies and ecstasies during the study period.

My sincere thanks are due to my Mother M. Hoseini, who had provided me great inspiration and facilities, encouragement and moral support at every stage of this research work.

My heart goes with love and affection to my beloved husband Massoud Kheirandish for his valuable support and my son Arian, for having to put up with my preoccupation with the thesis work.

It must be mentioned in this connection that while the help and suggestions I have received from several individuals and institutions have certainly helped to improve the quality of the present thesis, I am alone responsible for the errors and omissions that may still lurk in it.

Mysore
September 2011
