Acknowledgement

Many efforts have been made in the field of research in education at the primary, secondary and higher secondary levels but hardly any research has been undertaken in the field of education at the pre-primary stage. This is a solitary but humble effort in this research area.

A double purpose has been accomplished in the present study by developing a tool to measure general ability of small children of the age-group 3 to 6, and studying their general ability in relation to reading readiness.

The investigator respectfully pays great homage to his late father, who spent his entire life in educating children by establishing an institution for the purpose and who was the chief source of inspiration behind the present study.

This work is expensive, time consuming and requiring cooperation, from several persons. The researcher acknowledges that without them this prodigious work would not have been completed in time.

At this juncture, he takes the opportunity to express his heartfelt gratitude to his respectable guide Dr. M.T. Patel, Reader in Education who has been the main source of encouragement, inspiration and guidance. Without his blessings this novel study would not have been materialized.

He is also thankful to his bosom friends, Dr. R.M. Patel and Shri R.A. Vyas, who incessantly helped him during the entire study.
During the investigation, valuable help was rendered by Dr. A.S. Patel, Dr. J.Z. Patel, Dr. D.N. Patel, Dr. A.N.M.S. Abbasse, Dr. Pallavi Patel, Sarvashri C.J. Doshi, V.G. Officer, Gujarat State, G.K. Patel, Hiraben Dave, D.S. Parikh, N.J. Canara, and members of the staff of the Institute of Vocational Guidance, Ahmedabad.

He heartily thanks the headmasters, the members of the staff and the children of the pre-primary and primary schools of Gujarat State for helping him in the administration of the test. He is thankful to Shri P.K. Patel, for artistic presentation of the test-items; to Shri Jagdish Patel, for the printing work; and to Shri J.C. Christian, for decent typing of the thesis.

Finally, he is greatly indebted to his kith and kin, Sunita, Sushila, Jaymin, Darshan and Sonal for being patient with an ambitious and occasionally preoccupied, brother husband and father.

It is hoped that the present study will be of immense use to the educational institutions, students and research workers, who are concerned with educational and guidance programmes for the children of pre-primary schools of Gujarat State.
