## CONTENTS

### CHAPTER 0. INTRODUCTION AND PRELIMINARIES

- 0.1. Preliminaries .......................... 1
- 0.2. Summary .................................. 31

### CHAPTER 1. CHARACTERIZATIONS OF PRO-C*-ALGEBRAS

- 1.1. An intrinsic characterization .......... 35
- 1.2. A non-involutive case .................. 45
- 1.3. Some dual characterizations .......... 47
- 1.4. Local structure ......................... 56
- 1.5. Example .................................. 58
- 1.6. The bounded part ....................... 59

### CHAPTER 2. TENSOR PRODUCTS AND COMPLETELY POSITIVE MAPS

- 2.1. Tensor products ......................... 63
- 2.2. Admissible topologies on $A \otimes B$ .. 81
- 2.3. The pro-C*-topologies $\alpha$ and $\nu$ .. 93
- 2.4. Completely positive maps .............. 97
- 2.5. Completely positive maps between tensor products of pro-C*-algebras ... 114
