Prelude

Maximum people of highly populated India live in villages majority of them are involved in agriculture. The cattle animal is concerned with agriculture in India as the old method of cultivation is still in vogue here. Razing of cattle animal is also an additional source of income of the village in our country.

In 1965, national Dairy Development Board (N.D.D.B.) was set up. The object of meeting was the increasing demand of milk in rural as well as urban areas. In 1970 N.D.D.B. look up operation flood programme in order to organize co-operative milk societies in several probable places of India Taking the Kaira District (Anand) Co-Operative Milk producers’ union limited (AMUL) of Anand, Gujarat as a model with the above object in view. Then it developed rapidly in Gujarat. Dr. Kurian’s operation Flood made a miracle to the country. Earlier, I studied workers’ participation in ABAD Dairy. During this, I developed a desire to study this topic for all co-operative dairy units as well as co-operative fertilizer units of Gujarat. It’s fulfilling has been started in 1998. I was enrolled as a Ph.D. student in S. P. University, Anand. My synopsis was accepted. This study has been divided into seven chapters. The first four chapters contain the history of workers’ participation, dairy co-operatives and Fertilizer co-operatives in India and Gujarat. Chapter 5 and 6 show the comprehensive analysis and findings in Dairy Industries and Fertilizer Industries of Gujarat. And chapter 7 contains conclusions and suggestions. It has been tried to analyze the impact of the JMC before and after adoption of Technology of Participation in SABAR Dairy and IFFCO Kalol on experimental basis.

The whole research covers informative discussion. I hope this will definitely be a valuable collection for the research students of management and peoples of co-operative sectors.
