ACKNOWLEDGEMENTS

The present study on 'Economics of Irrigation' is presented for the award of Ph.D. Degree in Economics of Sardar Patel University, Vallabh Vidyanagar. At different stages of work, I have received help and encouragement as also comments and suggestions from several persons, to all of whom I owe a debt of gratitude.

The work was carried out under the supervision and guidance of Prof. Arun S. Patel. I am deeply indebted to him for his valuable guidance and encouragement at all stages of my work. In the midst of his multifarious assignments he always made himself available for consultations which have benefited me immensely. Needless to say that but for his painstaking efforts and guidance, this thesis would not have taken its present shape.

I am grateful to Professor J.H. Adhvaryu, Professor (Retired) and now Director of Irrigation Research Cell, Department of Economics, Sardar Patel University, who read an earlier draft of the thesis and offered valuable suggestions and provided constant encouragement in the work. I am greatly indebted to Shri Mahendra D. Desai, Senior Agricultural Economist, Economic Research Department, State Bank of India, Bombay and formerly Deputy Director of Agro-Economic Research Centre, Vallabh Vidyanagar (ABRC), who went through all the
draft chapters of the thesis and gave useful comments and suggestions for improvement.

I owe special thanks to Dr. Mahesh T. Pathak, Professor and Head of the Department of Economics and Honorary Director, Agro-Economic Research Centre for giving me an opportunity to be associated with the research projects pertaining to agricultural development in Gujarat as a staff member of the Agro-Economic Research Centre during 1974-1980. This opportunity enabled me to gain valuable insights into the problems of development of agriculture in Gujarat. I am also thankful to Prof. L. Vaidyanathan, Professor, Department of Economics, Centre for Development Studies, Trivandrum, with whom I had a useful discussion on the subject of the thesis, when he visited our Department under a UGC Scheme.

My thanks are due to Sreshthra M.R. Shah and V.C. Patel, Research Officers, AFRC, for going through draft of the Chapters II and III and making useful suggestions for improvement. I am also thankful to Dr. R.J. Raj, Dr. V.G. Patel, and the other faculty of the Department of Economics and senior staff members of the AFRC with whom I had very useful interaction on the subject at a seminar.

I am grateful to Dr. M.R. Shah and Dr. K.R. Patel, the officers of the Directorate of Agriculture, Ahmedabad, and District Agricultural Officers, Gujarat State, for their wholehearted cooperation in making available data required for this study.
I am thankful to Dr. P. Trirmurthy, Shri D.R. Patel, and Mrs. Smiita Shah and others at the Computer Centre of the Sardar Patel University for their help in the computer work. I also acknowledge the hearty cooperation of Dr. S.M. Charan and the staff members of the University Library of the Sardar Patel University and Shri Mranjan C. Juchit, Librarian of the AERC Library, Vallabh Vidyanagar.

I wish to record my thanks to Shri V.M. Patel for rendering assistance to me at various stages of this study and to Serveshree D.R. Patel, R.K. Padhiyar, Shri Mobile, C.A. Jnandar, S.B. Sarji and Shri Raj, for computation of the data, and to Shri K.S. Raj and C.M. Patel, the staff members of the Irrigation Research Cell for compilation of data used in Chapters IV and VI.

I am grateful to the University Grant Commission and the Department of Economics, Sardar Patel University, for providing me with financial assistance for the present study.

My thanks are due to Shri B.C. Patel who carried out the work of typing the thesis in both the draft and final forms almost single-handedly.

M.F. Patel
