ACKNOWLEDGEMENTS

It is with great pleasure and satisfaction that the work of construction and standardization of General Ability Test is being presented in service of the children of Gujarat State.

The investigator owes a deep sense of gratitude to his worthy guide Principal R.S. Trivedi for his inspiring and incessant guidance all throughout. He feels that, but for his unassuming and valuable help, it would not have been possible to complete the work with ease and depth.

The investigator would be failing in his duty if he does not express his sense of obligation to Dr. N.N. Shukla, for his valuable advice in various facets of the work. In the task undertaken, he feels highly indebted to Dr. B.V. Patel, Dr. I.A. Vora, his colleagues in the faculty, professors, headmasters, teachers and students of education, who have come to his help in completion of the work. He also feels contented in taking a note of engineering and medical competency of his kins Pankaj and Prashant, who took deep interest in all the phases of this work.

The investigator will never forget thousands of children of Gujarat, who actively cooperated in taking the test and thus helping a lot in the process of construction and standardization of General Ability Test.
