Acknowledgements

Working as a research scholar to pursue Ph.D. was like climbing a top of the mountain, step after another, accompanied by trust, enthusiasm, some hardships, frustration and joy. But this journey would not have been possible alone. It was the teamwork of the kind people around me who encouraged me to fulfil the task. Though, it is difficult to express my gratitude in words to all the people, I would like to give many thanks to the special mention here.

I am thankful to the Lord Somnath Mahadev for giving good health and wellbeing that were necessary to complete this journey successfully.

Foremost, I would like to give my sincere thanks to my honorific research guide, Dr. Mohan N. Patel, for accepting me as his research student without any hesitation and also for his excellent guidance, trust, enthusiasm, motivation and patience. I cannot forget the independence given to work in the laboratory and providing useful atmosphere throughout these Ph.D. years. His immense focus on the research, inside the lab and friendly nature outside the campus, makes him a contradictory person from this contemporary society.

I wish to express my sincere thanks to Department of Chemistry, Sardar Patel University, Vallabhb Viryanagar, a body as a whole, i.e. authority head, Professors, non-teaching staff.

I would like to thanks University Grant Commission of India, New Delhi for providing financial support under “UGC RFSMS” scheme.

I am very much thankful to Dr. Navin Talpada and Mukesh Barot for technical assistant in NMR, IR and UV–Visible spectroscopy laboratory.

Special thanks to Dr. V. R. Thakkar, who provided me an opportunity to work in the BRD School of Bioscience with his research students, Ravi R. Patel, Disha Patel and Parth, who have provided kind assistance in performing the biological activities.

I also want to thank past members of this lab: Dr. Promise Dosi, Dr. Bhupesh Bhatt, Dr. Hardik Joshi, Dr. Chintan Patel and Dr. Anshul Patidar for introducing me in the lab, sharing their knowledge, giving scientific advice, and many insightful discussions and suggestions. I am very much thankful to my lab mates, Pankaj Vekariya, Sanjay Gajera, Jugal Mehta, Khyati Thakor, Miral Lunagariya, Darshana Kanthecha and Bharat Pursuwani, for their useful
assistance and friendly environment in the laboratory, to work smoothly. Heartily thanks to Dr. Anshul Patidar and Pankaj Vekariya for helping to finish up the biological work. It has been a great teamwork in the lab, a great experience of working together, helping in adverse situation and being a part of the family functions. I heartily thank my close friends Vishal Odedara, Dilip Odedara, Savansinh Rathod, Savan Patel, Bhavik Joshi, Rajeshbhai Patel and Shaileshbhai Patel. They are all a fun bunch with lots of enthusiasm and optimism.

I would also like to thank my family members: My parents Shantilal Karia and Shobhanaben Karia; elder brother Anand and my bhabhi Minaxi; younger brother Tushar; who have always been supporting and encouraging me with their best wishes. It has been fun loving, spending time with my little nephew Dwij and getting relaxed after working hours. I could not forget to thank my uncle and aunty, Rajesh Karia and Shital Karia, my cousins Milonee and Ayush, who have been resident here, making my Sunday unforgettable, having delicious meals with them at home.

I am heartily thankful to my in-laws, who have always been motivating me in completing the task and encouraging me for my success.

Finally, I would like to thank my wife, Snehal Karia. She was always cheering me up and stood by me through the good times and bad.

Parag Shantilal Karia
