

## LIST OF TABLE

<b>TABLE .NO</b>	<b>TITLE</b>	<b>PAGE .NO</b>
<b>3.1</b>	Reliability of co-efficient of muscle fitness parameters, physiological and skill performance variables of male volleyball players	75
<b>3.2</b>	Training programme	82
<b>3.3</b>	Combination of resistance training Followed by plyometric training in the same session (Training schedule for 1 to 12 weeks)	84
<b>3.4</b>	Complex training of resistance training followed by a matched plyometric training in the same session (Training schedule 1 to 12 weeks)	86
<b>3.5</b>	Resistance training for first six weeks followed by complex training of resistance training with matched plyometric training for another six weeks in the same session (Resistance training schedule for 1 to 6 weeks)	88
<b>3.6</b>	Resistance training for first six weeks followed by complex training of resistance training with matched plyometric training for another six weeks in the same session (Training schedule 7 to 12 weeks)	89
<b>4.1</b>	Significance of mean gains /losses between pre and post test of combination of resistance training followed by plyometric training in the same session muscle fitness parameters, physiological parameters and skill performance variables	93
<b>4.2</b>	Significance of mean gains /losses between pre and post test of combination of resistance training followed by matched plyometric training in the same session muscle fitness parameters, physiological parameters and skill performance variables	95
<b>4.3</b>	Significance of mean gains /losses between pre and post test of resistance training for six weeks followed by combination of resistance training with matched plyometric training for another six weeks in the same session on muscle fitness parameters, physiological parameters and skill performance variables	97

<b>4.4</b>	Significance of mean gains /losses between pre and post test of traditional groups on muscle fitness parameters, physiological parameters and skill performance variables	99
<b>4.5</b>	Analysis of variance on pre-test means among the CRTPT, CRTMPT, RTCRTMPT AND TTG on muscle fitness parameters, physiological parameters and skill performance variables	106
<b>4.6</b>	Analysis of variance on post-test means among the CRTPT, CRTMPT, RTCRTMPT AND TTG on muscle fitness parameters, physiological parameters and skill performance variables	108
<b>4.7</b>	Analysis of variance on adjusted post-test means among the CRTPT, CRTMPT, RTCRTMPT AND TTG on muscle fitness parameters, physiological parameters and skill performance variables	111
<b>4.8</b>	Scheffe's test for the difference between paired adjusted post test means	113
