Chapter I

Introduction 2–28

1.1 Introduction 2
1.2 A general background of Iran 4
1.3 Islam in Iran 8
1.4 Education system in Iran 10
1.5 Higher education in Iran 11
1.6 Goals of higher education in Iran 12
1.7 Operational definition of the terms used 13
1.7.1 Religiosity 13
1.7.2 Locus of control 18
1.7.3 Mental health 21
1.8 Need and significance of the study 26
1.9 Religiosity, locus of control and mental health 27

Chapter II

Review of related literature: 30–79

2.1 Introduction 30
2.2 Religiosity and mental health 31
Chapter III

Method and procedures: 81–95

3.1 Design of the study 81
3.2 Sample 81
3.3 Tools employed 84
3.3.1 Religiosity questionnaire 84
3.3.1.1 Reliability and validity of the test 85
3.3.2 Locus of control scale 86
3.3.2.1 Scoring of the scale 88
3.3.2.2 Responses on items at serial numbers 89
3.3.3 Teacher mental health scale 90
3.3.3.1 Reliability 90
3.3.3.2 Validity 91
3.3.3.3 Administration 91
3.3.3.4 Item distribution 91
3.3.3.5 Scoring 92
3.3.4 Procedure for data collection 93
3.3.5 Statistical techniques 94
3.3.5.1 Descriptive analysis 94
3.3.5.2 Differential analysis 94
3.3.5.3 Correlations 95
3.3.5.4 Graphic representation 95
3.3.6 Processing of data 95
Chapter IV

Analysis of data and interpretation of results: 97–201

Introduction 97

4.1 Objectives of the study 97
4.2 Hypotheses of the study 98
4.2.1 Hypotheses in relation to differential analysis 98
4.2.2 Hypotheses in relation to correlation 100
4.3 Schematic presentation of results 102
4.3.1 Section I descriptive analysis 102
4.3.1.1 Discussion based on means 103
4.3.1.2 Discussion based on skewness 105
4.3.1.3 Discussion based on kurtosis 106
4.3.2 Section II differential analysis 113
4.3.2.1 Discussion based on comparison of art and science students 114
4.3.2.2 Discussion based on comparison of male and female students. 120
4.3.2.3 Discussion based on comparison of married and unmarried students. 127
4.3.2.4 Discussion based on comparison of urban and rural students. 132
4.3.2.5 Discussion based on comparison of employed and unemployed students. 137
4.3.2.6 Discussion based on comparison of arts, science, agriculture and engineering faculties. 142
4.3.2.7 Discussion based on comparison of up, middle and bottom groups of Diploma average(10+2). 147
4.3.2.8 Discussion based on comparison of up, middle and bottom groups of university average.

4.3.2.9 Discussion based on comparison of Freshman, Junior and Senior students.

4.3.2.10 Discussion based on comparison of students with 1-10, 11-20, 21-30 and 31-40 years urban residence.

4.3.2.11 Discussion based on comparison of students with age groups of 10-20, 21-30 and 31-40 years.

4.3.2.12 Discussion based on comparison of internally / externally controlled students on the basis of religiosity.

4.3.2.13 Discussion based on internally / externally controlled students on the basis of mental health.

4.3.3 Section III correlation approach

4.3.3.1 Introduction

4.3.3.2 Discussion based on intercorrelation between religiosity and mental health.

4.3.3.3 Discussion based on intercorrelation between locus of control and mental health.

4.3.3.4 Discussion based on intercorrelation between religiosity and locus of control.

4.3.3.5 Discussion based on intercorrelation between internal locus of control and religiosity.

4.3.3.6 Discussion based on intercorrelation between external locus of control and measures of religiosity.

4.3.3.7 Discussion based on intercorrelation between internal locus of control and measures of mental health.

4.3.3.8 Discussion based on intercorrelation between external locus of control and measures of mental health.
Chapter V

Summery, conclusions and recommendations: 203-238

Introduction 203

5.1 Islam in Iran 204
5.2 Religiosity 207
5.3 Locus of control 208
5.4 Mental health 210
5.5 Statement of the problem 212
5.6 Objectives of the study 212
5.7 Hypotheses of the study 213
5.7.1 Hypotheses in relation to differential analysis 213
5.7.2 Hypotheses in relation to correlation 214
5.8 Design of the study 215
5.9 Sample 216
5.10 Tools employed 216
5.11 Statistical techniques applied 216
5.12 Limitations of the study 217
5.13 Conclusions 218
5.13.1 Conclusions based on descriptive analysis 218
5.13.2 Conclusions based on differential analysis 219
5.13.2.1 Conclusion based on subject analysis 219
5.13.2.2 Conclusion based on sex analysis 220
5.13.2.3 Conclusion based on marital status 221
5.13.2.4 Conclusion based on geographical locale 222
5.13.2.5 Conclusion based on occupational status 223
5.13.2.6 Conclusion based on faculty type 224
5.13.2.7 Conclusion based on average of diploma 225
5.13.2.8 Conclusion based on average of university
5.13.2.9 Conclusion based on academic groups
5.13.2.10 Conclusion based on urban residence
5.13.2.11 Conclusion based on age groups
5.13.2.12 Conclusion based on internally / externally controlled groups on the basis of religiosity.
5.13.2.13 Conclusion based on internally / externally controlled groups on the basis of mental health.
5.13.3 Conclusion based on intercorrelations
5.13.3.1 Conclusion based on intercorrelation between religiosity and mental health
5.13.3.2 Conclusion based on intercorrelation between locus of control and mental health
5.13.3.3 Conclusion based on intercorrelation between religiosity and locus of control
5.13.3.4 Conclusion based on intercorrelation between religiosity and internal locus of control
5.13.3.5 Conclusion based on intercorrelation between religiosity and external locus of control
5.13.3.6 Conclusion based on intercorrelation between internal locus of control and mental health
5.13.3.7 Conclusion based on intercorrelation between external locus of control and mental health
5.14 Recommendations for future studies

Bibliography 240–272
Appendices 274–295
Appendix-I Mental health scale 274
Appendix-II Locus of control test 277
Appendix-III Religiosity questionnaire 280
Appendix-IV Translated copy of three Tests in Persian
