</table>
with respect to religiosity, locus of control and mental health.

4.2.6 Values of SS., MS. and f ratio of different faculty students on religiosity, locus of control and mental health.

4.2.7 Values of SS., MS. and f ratio of different categories Of Diploma average (10+2) on religiosity, locus of control and mental health.

4.2.8 Values of mean, t-ratio for anxiety factor with respect to Diploma average (10+2).

4.2.9 Values of SS., MS. and f ratio of different categories of university average on religiosity, locus of control and mental health.

4.2.10 Values of mean t-ratio for disabling symptoms with respect to university average (academic achievement).

4.2.11 Values of SS., MS. And f ratio of freshman, junior and senior students on religiosity, locus of control and mental health.

4.2.12 Values of SS., MS. And f ratio of different categories of urban residence students
on religiosity, locus of control and mental health.

4.2.13 Values of mean, t-ratio for religiosity and dimensions of faith in religion and faith in rituals.

4.2.14 Value of SS., MS., and f-ratio of different age Categories students on religiosity, locus of control and mental health.

4.2.15 Values of mean, and t-ratio for mental health and dimension of personal well-being, anxiety factor and disabling symptoms.

4.2.16 t-value for difference between internal and external locus of control students with respect to religiosity.

4.2.17 t-value for difference between internal and external students with respect to mental health.

4.3.1 Correlation between religiosity and mental health.

4.3.2 Correlation between dimensions of religiosity and mental health (N=400).
4.3.3 Correlation between locus of control and mental health.

4.3.4 Correlation between locus of control and dimensions of mental health (N=400).

4.3.5 Correlation between religiosity and locus of control.

4.3.6 Correlation between locus of control and dimensions of religiosity (N=400).

4.3.7 Correlation between internal locus of control (N=108) and dimensions of religiosity (N=400).

4.3.8 Correlation between external locus of control (N=108) and dimensions of religiosity (N=400).

4.3.9 Correlation between internal locus of control (N=108) and dimensions of mental health (N=400).

4.3.10 Correlation between external locus of control (N=108) and dimensions of mental health (N=400).

4.3.11 12×12 inter-correlation Matrix on the variable of religiosity, locus of control and mental health (N=400).
