	Synopsis
	<b>General Introduction</b>
<b>Chapter-I:</b>	
<b>Section-A:</b>	<b>Isolation and characterization of a an unusual novel anti-oxidant dibenzoyl glycoside from the plant <i>Salvinia natans</i></b>
	Introduction
	Present work
	Experimental
<b>Section-B:</b>	<b>Isolation and characterization of new sources possess anti-inflammatory and anti-antioxidant properties from the plant <i>Decalepis hamiltonii</i></b>
	Introduction
	Present work
	Experimental
	References
<b>Chapter-II:</b>	<b>Total Synthesis of (-)-Cleistenolide.</b>
	Introduction
	Present work
	Experimental
	References
<b>Chapter III</b>	<b>Stereoselective synthesis of cytotoxic yashabushidiol derivatives, (3<i>S</i>,5<i>S</i>)-1-(4-Hydroxyphenyl)-7-phenyl-</b>

	<b>heptane-3,5-diol and its (3<i>R</i>,5<i>S</i>) -Isomer.</b>
	Introduction
	Present work
	Experimental
	References
<b>Publications</b>
