ACKNOWLEDGEMENT

Researcher is a traveler and his research is an endless journey. He keeps on moving with a continuous endeavor of exploring newer avenues with the torque of both failure and success. During this long journey, he needs to take halt and the completion of this thesis is the first halt of “my” journey. Today when I finished this first phase, I go in a flash back and realize that I was a stone with no value, but I learned and opened my eyes with learning and blessings at a place called “Department of Microbiology” and by the abundant grace and blessings of GOD and HIS everlasting light of guidance, I was able to accomplish this work. I would have never reached at this stage so far in my journey, if I was not fortunate to have support from ma well-wishers. I thank one and all for accompanying me, sharing my burdens and making this journey a happy and memorable experience, I should acknowledge all at this place, thought the word acknowledgement itself is a very small things in place of what I get.

First a foremost, I should thanks and acknowledge Department of Biotechnology, Department of Science and Technology and Council of Scientific and Industrial Research, Government of India, for extending financial support for my PhD. tenure as JRF and SRF.

I am grateful to Prof. Arun Grover, Vice Chancellor, Panjab University, Chandigarh, India for giving me opportunity to work in this premier University of the nation and providing all necessary facilities and encouragement for the completion of my thesis work.

An ostentatious use of words will not suffice to express my endeavoring sincere thanks and gratitude to my guide Dr. Naveen Gupta, Assistant Professor, Department of Microbiology, Panjab University, Chandigarh for his benevolent guidance, keen interest with critical and valuable suggestions without which this work could not have been possible to come to its fruition and worthy presentation. I am extremely grateful to his for giving me an opportunity to explore this field, even when I had no clue about this subject. He provided me full space and freedom to work and execute my ideas in research and prove them without any boundations. It is his qualities of respecting everyone’s thinking and cultivating confidence in students that I admire the most. I must confess this here, that he had not been just a guide, but more than that a guardian. I always felt a affection and ofcourse anger when I needed but that all made me capable for all this and today I would like to say a million thanks to you sir for all what I have learned and got at this stage. I would certainly not have learnt microbiology so well, if you would have not shown trust on me. What all I can say is that he is indeed a best guide for any student. Thanks Sir...for everything.

It is my privilege to express heartful thanks and sincere gratitude to Dr. Prince Sharma, Professor, Department of Microbiology, Panjab University, Chandigarh, for providing me a space to pursue research work in his lab and providing his valuable help in experimental planning, moral support and teaching in research aspect of my thesis work. I am immensely grateful to him. He has been constant source of encouragement, help and inspiration to me.

It gives me immense pleasure to express my deepest sense of gratitude and regards to Dr. S.K.Soni, Professor, Department of Microbiology, Panjab University, Chandigarh for his excellent guidance, incessant discussion and constant encouragement throughout my work. He has been the best mentor and teacher I could have wished for. It was his care and moral
support that made this difficult task an easy one. His inspiration has been instrumental in shaping my future career.

The Microbiology department is not just an address where I conducted my research .... There’s something more to it.... a lot more.... For past four years, the department had been my second home. I call it a home because the freedom, love, respect, concern and warmth provided by people in the department makes you feel at home, with your family.... and that’s the reason we proudly call it “Microbio Family”. The temperament, spirit and enthusiasm prevailing in the air of this place energizes you to put in your best effort in whatever you do. Prof. Praveen Rishi, Head of Department, whose humble and democratic nature allowed approaching him without slightest hesitation for any kind of problems or even suggestions. He always spared ear to it and readily acted upon when required.

I am also thankful to Dr. Abhay T. Sangamwar, Assistant Professor, Department of Pharmacoinformatics, National Institute of Pharmaceutical Education and Research, Mohali (Punjab) for helping me in homology modeling and docking studies and providing guidance at various phases of my PhD. I would also like to thank Dr. Manoj Kumar, Professor, University of Pharmaceutical Science, Panjab University, Chandigarh for giving me a wonderful training on Bioinformatics. I am grateful to Ballarpur Industries Limited (BILT), Yamunanagar, Haryana, India for providing the pulp sample and collaborating for their lab facility for industrial application.

With a profound sense of gratitude I take this opportunity to express my thank to all past lab seniors Dr. Nancy George, Dr. Fantahun Woldesenbet for not only helped me learning science and experimentation but also provided full support till the end of my phase.

Coming to my home place i.e. My Lab…… it’s a wonderful place, where anyone who comes observe “fell good factor”. With the grace of god and hardwork together with all lab member’s, the lab is now standing on a comparable level with many institutional labs. I felt very genuine and homely environment in my lab so I like to say special thanks to my lab member Sonica and Juniors Vivek, Deepak, Aditya, Shilpa, Neha and Archita.

I am extremely thankful to Ravinder and Lokender for helping in several spheres of my research work and providing a stimulating and fun filled environment in which I learned and grew. They provided me lot of support and care, whenever I needed guidance, whenever I got confused.

I am greatly thankful to my friend Anil for the constant support and lovely company throughout the duration of this project in hostel as well as department.

Fortunately the spirit has been sustained by an unstinted, unflinching support, which has been forthcoming perpetually from Arunika who have been there with me and always boosted up my morale whenever small disappointments made me feel a bit low. I am very thankful to my best buddy for encouragement and moral support.

I feel really lucky to have good friends Nisha, Vijaya, Chetna, Sushil, Shruti, Sumeha, Vivek Sharma, Aitin Sharma, Sushat Tickoo, Satya Prakash, Rajneesh Sir who have motivated, and helped me all through my research work.
One more chapter played by some contributing people are M.Sc student, who worked with me for their M.Sc. Dissertation and this was the hidden sources of energy that boosted my output. I thank Anil Sharma, Pankaj Verma, Kshitiz Gupta, Aditya Prakash Nanda, Prerna Bhardwaj, Amrita Kaur, Gauri Shanker, Sunpreet, Meenakshi, Chandani, Aditi David and Priyanak. I appreciate their sincerity, punctuality; obedience and dedication for work that helped me learn a few things from them as well.

Thanks my Freindezzzzz ... .......... I love u all ......

I am highly grateful to the Non-teaching staff of my department Mohan Sir, Ved Prakash Sir, Pradeep Arora Sir, Ramesh Jain Sir, MP Singh Sir, Anil Sir for being constant source of encouragement and help.

This thesis would have been possible with hard work, devotion, dedication and concentration, which I was lessoned by my ever loving parents Smt. Geeta Kanwar & Shri. Pratap Singh Chauhan and my brother Vikram Singh. Thanks for supporting. Since the very beginning of my childhood when I started withstand and running on the earth in support of their fingers. I would have been able to prove the perfection of their trainings and dream true. With gratitude and reverence, I acknowledge and admire the love, confidence and moral support bestowed on me. Special thanks to my mother for being my friend and mentor. Its her prayers that has got me so far.

I owe my loving thanks to my cute sister, Dr. Prerana Singh, for encouragement when it was most required. She is the one who always pushed me forward and helped me to go on inspite of various ups and downs. Thank you sis for being standing with me in all phase of my life.

And finally, my heartfelt gratitude to all the people within the Panjab University, Chandigarh who helped me to steer when sailing close to the wind of bureaucracy on the last leg of the race! Last but not the least, I would like to acknowledge all those whose name do not figure here but helped me directly or indirectly in shaping this thesis.

Date: 30th June, 2014

(Prakram Singh Chauhan)
