ACKNOWLEDGEMENTS

It was a great privilege for me to carry out my research study in one of India’s best and well equipped laboratory at Molecular Biology Unit, National Centre for Cell Science (NCCS), Pune. I express my heartfelt gratitude to Padmashree Dr. G.C. Mishra, Ex-Director, NCCS and Dr. Shekhar C Mande, Director, NCCS, for providing me this unique educational opportunity to carry out my research work. This project was funded by a grant from Department of Biotechnology (DBT), and a fellowship by Council of Scientific and Industrial Research (CSIR), India. I thank both these organizations for financial support.

I feel extremely honored for the opportunity to work under the expert guidance of my principal supervisor Dr. Yogesh S Shouche, who created an excellent working environment for me wherein I learnt many interesting facts in the field of science. I am grateful to him for his help, advice, guidance and tremendous support throughout my work and thesis. He has always been a great source of encouragement for all of us as well as an embodiment of love.

My sincere thanks to my Ph.D. guide Dr. Ramesh R. Bhonde, for granting me the opportunity to carry out Ph.D. under his valuable guidance. I extend my profound gratitude to my collaborators Dr. Milind S Patole and Dr. Hemant V Ghate (Modern College, Pune) for helping me throughout my study.

I am very much thankful to M.Sc. dissertation students Bhavin Shah, Dhiraj Agrawal, Pracheta Rana, Digvijay Misal, Aditya Takale and Arvind Bhushan for collecting the fly samples and their co-operation and kind behavior and help while completing their projects. This thesis would not have been possible without their support and help.

I am highly indebted to Dr. Dana Nayduch (Georgia Southern University, USA) for her expert advice and conceptual suggestions during the compilation of data and the preparation of manuscripts. I would also like to appreciate the patience with which she taught me every detail about the work. I am grateful to Dr. Erika
M Tóth (Eötvös Loránd University, Hungary) for sharing isolates (Ignatzschineria larvae L1/68T, Wohlfahrtiimonas chitiniclastica S5T), Dr. Manfred Rohde (Helmholtz-Zentrum für Infektionsforschung, Germany) for providing microscopic images of the isolates and Prof. Dr. Erko Stackebrandt, Dr. Cathrin Spröer (DSMZ, Germany) and Dr. Tapan Chakrabarti (MCC, Pune, India), for providing valuable ideas and helpful comments in the initial stage of the study and in preparing manuscript (IJSEM).

I am indebted to my colleagues and good friends Pankaj Verma, Chakkiath Paul Antony, Prahsant Kumar Pandey, Girish Jayant Kulkarni and Nishant Mittal for being with me, in my thick and thins bearing and sharing with me all the troubles I had, without which I would not have been able to get a fruitful outcome for my thesis. I also owe a lot for their love and constant support. Their help and encouragement made me feel confident to fulfill my desire and to overcome every difficulty I encountered. Pankaj Verma and Chakkiath Paul Antony patiently advised me and always guided me in the right direction. I have learnt a lot from them and without their help I could not have finished this thesis successfully. Such few words are not sufficient to express my gratitude towards them.

I owe my sincere thanks to all my senior colleagues Dr. Gurdeep Rastogi, Dr. Mahesh Dharne, Dr. Ashraf Yusuf Rangrez, Dr. Rajini Kant Dixit, Dr. Aijaz Ahmad Wani, Dr. Kaushal Sharma, Dr. Jay Siddharth, Dr. KM Dayananda, Lokesh Sharma sir, Dr. Bipin Chandra Salunke, Kaustubh Ghokale, Dr. Kamlesh Jangid, Dr. Parag Vaishampayan, Dr. Uma Shankar, Dr. Sachin Surve, Dr. Venkata Prasad Surakasi, and Dr. Chandresh Thakker for constant help, support and their friendship.

It is a great pleasure to thank all my fellow colleagues and friends Dhiraj Dhotre, Sajad Hamid Ahanger, Himanshu Kumar, Shakti Charan Singh, Shrikant Pawar, Sandeep Walujkar, Gulab Kirwale, Rahul Salunkhe, Shailesh Sawant, Mangesh Suryavanshi, Snehit Mhatre, Shailendra Rane, Sashikant Sharma, Viduthalai Rasheedkhan, Avinash Sharma, Amit Yadav, Nachiket Marathe, Mandar Rasane,
Navin Dandi, Swapnil Gaikwad, Archana Meshram, Arpita Kulkarni, Sweta Khobragade, Ashwini Atre, Sunil Banskar, Sunil Dhar, Dr. Deepali Korade, Dr. Kiran Pawar, Shrikant Bhute and Mahesh Sonawane. I will never forget the company of my friends in my life from the laboratory whose advice was always helpful during my research work. I enjoyed the atmosphere, their friendship, and their constant support.

I would like to thank Mr. Sarang Satoor (sequencing facility) for timely help in carrying out some important computational work and sequencing related back up of data and Mr. Hitendra Munot for ordering and providing all the lab-wares and chemicals.

I owe my deepest gratitude to my devoted wife Pragati and my son Raghav (Ram Ji, Lucky, Cutest Baby Son!). They constitute the backbone of my happiness. Their love and support without any complain or regret has enabled me to complete my Ph.D. My wife took every responsibility and acted as both mother and father while I was away and suffered all the bitterness to take care of my son and my family. I owe my every achievement to both of them.

I offer my apologies to all those who have supported me and whose names might have inadvertently missed out here.

Last but not the least, words are not enough to express my heartiest gratitude to my Parents, who brought me into this earth, nurtured me with their selfless love and did innumerable sacrifices to help me build up my educational career and become an individual of my own. They have always been an inexhaustible source of encouragement and inspiration from them. I owe my life to them. Above all, I would like to thank God for providing me with good parents, near and dear ones and for providing me the opportunity to work for mankind.

Arvind Kumar Gupta
