AKNOWLEDGMENTS

It was a magnificent as well as challenging experience to work as PhD student during all those years. The research presented in this licentiate thesis has been carried out at the department of Electrical Engineering, National Institute of Technical Teachers Training and Research, Chandigarh. The path towards this thesis spans several years of work with finally the development of the DCMPA. In all these years, many people were instrumental directly or indirectly in helping me along the way.

First of all, I want to thank Prof (Dr) K.M.Rastogi, Director, NITTTR, Chandigarh for accommodating me as Ph.D research scholar in his institute and thus providing me platform to work on this thesis.

This dissertation would not have been possible without the expert guidance of my esteemed supervisor, Prof (Dr) S.Chatterji, Head of department, Electrical Engineering department, NITTTR, Chandigarh. First of all; I wish to thank him for introducing me to the world of research and for his valuable guidance. The writing of a dissertation was obviously not possible without his personal and practical support. Not only was he was readily available for me, as he so generously is for all of his students, but he always read and responded to the drafts of each chapter of my work more quickly than I could have hoped. His oral and written comments are always extremely perceptive, helpful, and appropriate. I am also thankful to him for allowing me some extra time to finish my experimental work.

I want to express my gratitude to Prof (Dr) Sohi (Ex Director), University Institute of Engineering & Technology, Chandigarh and Prof (Dr) Renu Vig, Director, University Institute of Engineering & Technology, Chandigarh for advising me to pursue research work, apart from regular teaching work at UIET. I must mention
The valuable support which I have received from my department co-coordinator Mr. Y.P. Verma, Assistant Professor (EEE Department), UIET, Chandigarh, for sparing me at times to complete my work.

The encouragement and support given by my parents Mr. K.S. Virdi and Mrs. Surinderjit Kaur are beyond words. A special thought is devoted to my parents for a never-ending support. It was hardly possible for me to thrive in my doctoral work without the precious support of my husband Mr. Harvinder Singh.

I was also fortunate to receive guidance and help from my colleague Ms. Lini Mathew, Associate Professor (EE Department), NITTTR, Chandigarh and Ms. Ritula Thakur, Assistant Professor (EE Department), NITTTR, Chandigarh. I also wish to thank all my friends. I am blessed to have my friend Ms. Aditi Gupta with me for providing lot of help and moral support during all the tough times in these past years.

Finally, this milestone would not have been possible for me to achieve without the blessings of the Almighty.

Despite of all the assistance provided by Prof (Dr) S. Chatterji and others, I alone remain responsible for the content of the following, including any errors or omissions which may unwittingly remain in this thesis.
