Chapter 1 General Introduction, Scope and Contents of Present Work

1.1	Introduction	1
1.2	Scope of the present work	8
1.2.1	Physical parameters	16
1.2.2	Dielectric properties	17
1.2.3	Optical absorption	19
1.2.4	Electron spin resonance	27
	a) General Spin-Hamiltonian	31
	b) Line shapes	35
	c) Line width and intensities	36
1.2.5	Magnetic susceptibility	38
1.2.6	Infrared spectra	39
1.2.7	Raman spectra	41
1.2.8	Rare earth ions and Optical properties	44
1.3	Brief review of the previous work on TeO ₂ based glasses	50
1.4	Motivation and objective of the present work	57
1.5	Contents of the present work	59
	<i>References</i>	60

Chapter 2 Experimental methods

2.1	Introduction	67
2.2	Glass preparation	67
2.2.1	Composition of the glass	67
2.2.2.	Methods of preparation of glasses	68
2.3	Characterization of the samples	70
2.3.1	X-ray diffraction	70
2.3.2	Scanning electron microscopy & Energy dispersive spectroscopy (EDS)	72
2.3.3	Physical parameters	75
2.3.4	Differential scanning calorimetric studies	76
2.4	Analytical techniques	77
2.4.1	Dielectric measurements	77
2.4.1 (a)	HP 4263 B LCR meter	77
2.4.1 (b)	Sample holders	78
2.4.2	Magnetic susceptibility measurements	79
2.4.3	Spectroscopic properties	81
2.4.3 (a)	Optical absorption spectra	81
2.4.3 (b)	Electron spin resonance spectra	84
2.4.3 (c)	Infrared transmission spectra	87
2.4.3 (d)	Raman spectra	87
2.4.3 (e)	Photoluminescence spectra	88
	<i>References</i>	91

Chapter 3 Spectroscopic and dielectric properties of ZnF₂-As₂O₃-TeO₂ glass system doped with V₂O₅

3.1	Introduction	92
3.2	Brief review of previous work on the glasses containing vanadium ions	94
3.3	Results	104
	XRD, SEM, EDS, DSC	104
	Optical absorption spectra	110
	Photoluminescence spectra	112
	ESR spectra	112
	Infrared spectra	116
	Dielectric properties	119
3.4	Discussion	126
3.5	Conclusions	141
	<i>References</i>	144

Chapter 4 Spectroscopic features of Ni²⁺ ions in tellurite-arsenate glass system

4.1	Introduction	150
4.2	Brief review of the studies on glasses containing nickel ion	151
4.3	Results	157
	XRD, EDS	158
	DSC	161
	Optical absorption spectra	163
	Photoluminescence spectra	167
	Infrared spectra	169
	Magnetic susceptibility	170
	Dielectric properties	172
4.4	Discussion	177
4.5	Conclusions	189
	<i>References</i>	190

Chapter 5 Influence of crystallization on luminescence characteristics of Pr³⁺ ions in PbO–Sb₂O₃–B₂O₃ glass system

5.1	Introduction	193
5.2	A brief review on the spectroscopic studies of Nd ³⁺ , Sm ³⁺ and Eu ³⁺ ions in various glass systems	196
5.3	Results	205
	Physical parameters	206
	DSC	208
	IR spectra	208
	Raman spectra	212
	Optical absorption spectra	215
	Photoluminescence spectra	223
5.5	Discussion	233
5.6	Conclusions	246
	<i>References</i>	248

Chapter 6 Summary and Conclusions

6.1	Summary	257
6.2	Conclusions	258
